

Newsletter

February 15, 2021

This last month we reached our goal for the entire year for our \$165+ Billion in Assets.

Our goal was to secure funding for \$165 Billion this year, \$10 Billion in Q1.

Our focus for the rest of Q1,2021 funding the 8 startups we sponsored.

Trading

The market this last month has been extremely volatile for small Cap, Tech, Pharma, Real Estate, etc.. our trading partners have been able to ride the FOMO in the market with momentum and dip trade strategies on day trades.

Swing trades have been solid with the 3D printer companies, Tesla and other EV stock and supporting companies.

Real Estate

The current market is topped out and as we wait and watch to see the turn, we are seeing properties that have not been on the market for decades. In Aspen this is the best time to find those properties that are rarely, if ever, available.

Our focus on development projects for ground up construction is currently our only focus besides agricultural lots. The 5 projects we have scheduled this year are; highrise, research compound, sustainable development, entry level development, offices.

Energy

The focus on the acquisition of a car company is taking shape with ASCAP and its partners.

Final Notes

Thank you for taking some time to read our newsletter.
