

2020 Review

January 1, 2021. Christine, Jason, Joanna, Christian, Todd, Kristine, Kevin, Lewis, Jeremiah, Lawrence, Ed, Norbert and many others that have helped, but are not directly involved, we thank you for your service this year.

The financial associates; Blair, Michael, Dennis, Sam, Donald, Grandville, Cluff, and many others we thank you for helping us to coordinate: Private Equity, Banking, Trading and other financial resources for our Clients.

Submissions in 2020:

- \$150 Billion in Nevada mines, unapproved
- \$27 Billion in Nevada mines, approved
- \$300 Million in Idaho mines
- \$1.2 Billion in Oregon mines
- \$15 Billion in Alaskan mines
- \$750 million in Art
- \$125 million in Jewelry
- \$100 million in Gold with SKR's
- \$3.2 Billion in Michigan mines
- \$6.2 Billion in Copper Powder
- Total submissions in 2020: \$188.875 Billion
- Approved assets: \$36.4 Billion - (\$27 Billion delayed) \$9.4 Billion.
- Monetization/Funding approved: \$1.6 Billion of \$9.4 Billion or 17% CTV (cash to value).
- 17% of approved assets value monetized without recourse.
- Funding programs for revenue equals 17% of the value, every month without recourse.
- Private Trade in house: averaging 7% per day trading, 87% per month swing trades, 112% for cryptocurrency(ongoing strategy is not substantial, 2021 refraining on scale).....Day Trading and Swing Trading is our focus in 2021. We are estimating 50-85% monthly returns.

- ❑ Forex (not enough consistent trading opportunities, setups, strategies for our traders to focus time and resources) up 3% in trades across the Forex board with minimal trades, only a few months of trading.
- ❑ Consensus focus our time and money towards small and large cap, startups for IPO and other opportunities which we can apply compounding capital, increased revenue and or exponential growth.

Summary: Our first year in business, though many items are carried over from previous businesses, companies and online platforms this compilation of Capital tools/resources is still being calibrated and scaled for maximum productivity. We will see a balance in 2021 as we train our staff, organize our resources and leverage accordingly. We are ready to scale up as we see revenue in the first quarter of 2021. Our ability to lever, capitalize, compound and grow will produce millions in production for our Startups in 2021, as well as create a multitude of Unicorns for 2021-2022.

We predict 5 Unicorns in 2021-2022 as well as quality assets to be monetized. Our in house trading will see a realized Billion Dollar fund.

Our collaboration will see Cancer research centers cure a minimum of 100 cases. Our startups will see an electric helicopter with 1,000 mile range or more. A car with unlimited range and a rail gun that is portable and ready for use in 2021 in a pilot program. The Aspen Compound for research and development will be finished 2021 to push our project development as well as our humanitarian efforts world wide, setting the stage quarterly and establishing a base for all our projects every quarter moving forward.

2021 is here and we are ready for great things while we “make great things happen”!

GOAL Q1 2021 Our startups are posted, our next gen startups are posted, ASCAP is looking for \$10 Billion in quality assets for Q1 2021 and will fund 20% of those assets, using 10%

or \$200 million for our startups and humanitarian projects which includes 500,000 generators for Africans in need of electricity with power enough; for one burner, one phone and or tablet with a light(s) included per household. Our humanitarian effort is the vision of Kevin Lowther and is also realized by all of us at Aspen Capital. We have all adopted his vision for this future which will include the entire world before it is complete.

Owners / Staff of Aspen Capital,
