

# Wayland Area EMS

## Information Memo

Memo Number: 2025-2  
Topic: Truck Computers  
From: Kathy  
Date: 01/03/2025

We were graciously gifted 5 new Dell Tough-books from Gun Lake Casino. These were given with the intent of replacing our old, outdated computers. These are not touch screens. But much lighter and slightly bigger screen.

These will be strictly for E-PCR's which means they are loaded with minimal on them.

We kept with the 'Red' icon for internet-based report writing and 'Blue' icon for the field version.

Each computer is labeled and paired with the monitor in that specific truck.

Until we are confident that all the bugs have been worked out the old computers will still be in the trucks. They are not plugged in, so if you need them you will have to unplug the new ones and plug the old ones in.

Please let Brenda or Kathy know if there are any issues or difficulties connecting to monitor.

Once again, we are very thankful to have received these! Please be gentle with them to ensure that we can keep our equipment in good condition for everyone to use.
