Executive Summary

Founder – Ricky Patel, PhD

Ricky holds a PhD in Clinical Neuroscience from King's College London with a specialisation in in vivo/in vitro neurodegenerative diseases and expertise within the bio/deep tech investment spaces from pre-seed through to pre-IPO. Ricky currently leads technical due diligence for a single-family offices worldwide for all biotech, deep tech, AI deals. Directly advising the investment committee (IC).

Enabling family offices and UHNWs to diversify within the technical bio/deep tech investment space by providing technical due diligence expertise and vetting emerging managers (VC/PE) for LPs has made Ricky an exceptionally sought after. With a large LP network, Ricky has cultivated strong relationships with family offices worldwide. He has several advisory roles from family offices, UHNW networks, to venture partner advisory roles.

His family offices network stretches from USA, Europe, Asia, Australia and is continuously expanding. Ricky provides expertise and insights within biotechnology and deep tech along with potential deals which would be of interest to family offices. These deals include but are not limited to: Biotechnology, Deep tech (semiconductors & space tech), AI, and Secondary market deals by leading SPV deals.

A truly unique individual who provides PhD level scientific expertise, speaks and understands the startup/investment language, and possesses personal family office relationships. Ricky has carved a niche in the space of bio/deep being one of very few who have PhD level expertise, an understanding of capital markets, and family office/strategic VC investor relationships along with providing niche strategic advice.

What We Do

At Point Science Analytics we lead the technical due diligence for FOs worldwide. From pitch-deck screen through to term sheet/milestone setting support. We support families for the entire deal duration, with our expert driven empathic approach. For those reasons we have become highly sort after within the FO and philanthropy network.

Typically, FOs are conducting financial due diligence. However lack the technical PhD level expertise, commercial market understanding, and futurism of technology in order to correctly vet private market scientific deals.

As an external service provider to FOs, we take care of this all. Enabling them to focus on other aspects of operations/sourcing/portfolio/relationship management which moves the pin forwards, allowing families to create leaps and generational wealth and legacy.

FOs who have created wealth in real estate, oil & gas, and trade are looking to liquidate their assets and deploy capital into private market biotech, deep tech, AI deals. As the FO generation moves on, this is becoming more and more common. Our services are highly regarded by families due to our privacy and discretion.

As of 2025 we have been required to function more in the philanthropy space of biotech/deep tech and screen deals for donors. Along with advising on potential life science real estate projects due to our laboratory experience, understanding of FO capital markets, and technological insights of the future.

How We Operate

Due to the nature of the clients we work with, privacy and discretion is critical. FOs reach out to us, refer us and work with us due to this trust.

We have a strict policy to not release any client, LP, FO information or data.

We do not publish or send testimonials/references of previous clients (FOs) we have worked with. All prospective clients have a screening call with Dr Ricky Patel and are able to ask specific questions regarding work conducted along with our expertise.

As a company, we are not a capital raising firm and do not make introductions to FOs. A strict policy is in place as we do not work on success fees and are not a broker-dealer.

Please note: specific expertise, advice also extends outwards of what is present within this document. This document is for informative purposes as our services are bespoke to each client's needs along with costings.

For pricing, we would need to establish an understanding of your specific needs, duration of project, timelines, and budget.

Advisory Hourly Rate
