# Executive Summary

Point Science Analytics - Ricky Patel, PhD

**Point Science**  
ANALYTICS

Ricky holds a PhD in Clinical Neuroscience from King's College London with a specialisation in in vivo/in vitro neurodegenerative diseases and expertise within the bio/deep tech investment spaces from pre-seed through to pre-IPO and secondary market companies.

Ricky is currently working with ultra-high-net-worth groups and family offices, along with top tier VCs advising on the science of investments, further developing their network, relationships and facilitating some of the best pre-vetted deals around. With a large LP network, Ricky is working with GPs of VC funds by advising/facilitating their fundraise with LPs.

Ricky further advises bio/deep tech founders on the deep science of this field along with investment outreach strategy and execution, with the ability to make VC introductions due to his vast, tailored network.

A truly unique individual who speaks and understands the startup/investment language. Ricky has carved a niche in the space of bio/deep and with the knowledge gained from his PhD can contribute vastly to the technical progress of startups and investment theses.

# Hourly Advisory Rate

# £1,200/hr

## Bio/deep tech technical advisory.

- Technical consulting for experimental *in vivo/ in vitro* experimental design if you're within the biotech sphere.
- Internal due diligence for bio/deep tech startups to evaluate and address potential red flags early on.
- Idea validation and progression within the neuroscience and AI world.
- Pitch deck review and commercialisation potentials along with connections to trusted IP attorneys to best assist/advise you.

## Investor Advisory.

- Investor outreach strategy, formation, execution.
- Investor/VC introductions - bio/deep tech specific.
- Investor advisory for GPs of VC funds raising with LPs and accelerator/incubator/studios portfolio startups support.

# Retainer 1

## £10,000/Month

Specific focus on investor advisory, business development, and investor relations within the bio/deep tech market.

Ideally for VC funds, accelerator/incubator/studios, family offices, UHNWs who require an expert advisor with a vast network in an ultra specific niche field. Included but not limited to:

- Investor outreach strategy, formation, execution.
- Introductions to key industry leaders in bio/deep tech.
- Investor advisory for GPs of VC funds raising with LPs and accelerator/incubator/studios portfolio startups support.
- Pitch deck reviews/pre-screening for bio/deep tech startups.

# Retainer 2

## £20,000/month

All services from Retainer 1 included along with the highest of quality, pre-vetted deal flow from founders to GPs of VC funds and secondary market tech companies. Including but not limited to:

- Top-tier bio/deep tech deal flow from pre-seed through to Series A onwards.
- Moonshot specific option for bio/deep tech deals
- Life Science real estate investment opportunities (coming soon).
- Top-tier introductions for investment in secondary market tech companies.
- VC deal flow for GPs looking to raise funds in the bio/deep tech space.
