AERIAL DRONE PROTECTION

EYE IN THE SKY

Security drones enable the fastest response to alarms or emergencies and provide a consistent “eye-in-the-sky” patrol presence. As an end-to-end hardware/software solution, our drone system provides rapid real-time aerial situational awareness and act as a major force multiplier to legacy systems and operations.

OUR STORY

Our mission is to enhance protection of facilities and the people who work in and around them. By combining cutting-edge aerial drones with real-time analytics, we deliver a security solution that sets a new standard for our clients.

OPERATIONAL SUPERIORITY

With more than 45,000 automated patrol or alarm response missions completed, it's the world's most widely-used automated security drone system. And because every mission is live-streamed to the cloud, you can monitor your systems from anywhere
