ELEVATE LIFE • DREAMSCAPE  
SEIZE THE DAY • ESSENTIAL LUXURY • TENDER LIVING

**SURROUND YOURSELF WITH DESIGN** that reflects your personality, dreams, and motivations.

A key to energizing each new day is filling the environments in which we live, work, and play with the colors and styles that bring us the most joy.

As a leader in style and design, Daltile is pleased to provide you with our official 2023 Trend Report, sharing the latest colors, interior fashion trends, and tile designs.

# TABLE OF *contents*

04

## **ELEVATE LIFE**

Positivity has become one of the most effective antidotes to counteract the pessimism of the last two years and the trend of Elevate Life embodies a bold positivity! Elevate Life celebrates with mood-boosting colors; tactile fabrics; bold patterns; oversized proportions; visuals that are playful, quirky, silly; and objects embedded with positive memories.

08

## **DREAMSCAPE**

The new interior design trend of Dreamscape is influenced by the desire to escape the demands, disappointments, and pressures of the physical world while finding relaxation, fulfillment, and many times a new identity in the digital world. Dreamy blues, purples, greens, metallics, and black are mixed with geometric shapes, magic eye reverberations, ethereal lighting, and flowing movements.

12

## **SEIZE THE DAY**

The trend of Seize The Day embodies the mindset of living in the moment while making space for nostalgia and comforting memories. It is about rediscovering traditional craftsmanship techniques and materials. The color palette of Seize The Day is very earthy, focused on beiges, creams, light browns, and a fabulous terra cotta.

16

## **ESSENTIAL LUXURY**

The notion of luxury has been changing, refreshing the traditional indicators of splendor. The trend of Essential Luxury is about enjoying moments of indulgence in a new way – blending beauty with heritage and pop culture; crafts with high-end technology and sustainability; multi-cultural inspiration with Art Deco and Gothic references.

20

## **TENDER LIVING**

Care and compassion find their voice through the Tender Living mindset that reclaims care to the fullest: care for self, others, and the planet. Tender Living fosters well-being, cocooning, inclusivity, and regeneration – expressing itself through Biophilic Design, multi-sensorial interaction, natural colors, sustainable practices, the beauty of imperfection, and neutral Scandinavian style.

# ELEVATE LIFE

# ELEVATE LIFE

## EXPERIENCE PLAYFUL JOY

Positivity has become one of the most effective antidotes to counteract the pessimism of the last two years and the trend of Elevate Life embodies a bold positivity! Elevate Life celebrates with mood-boosting colors; tactile fabrics; bold patterns; oversized proportions; visuals that are playful, quirky, silly; and objects embedded with positive memories.

The colors of Elevate Life embody the desire for fun, surprise, humor, and engagement by unleashing vibrant hues such as bright oranges, yellows, greens, blues, and fuchsia. These bright colors are partnering with psychedelic patterns and round shapes, bringing back the vibrant 60s and 70s mood. Such Avant-Basic design broadcasts loud retro vibes through unconventional shapes (think curvy, wavy, elliptical), bold geometric forms, sculptural silhouettes, and magic eye prints. The energy and optimism of the 80s is also back via the New Maximalist aesthetic blending bold patterns, oversized proportions, multicolor effects, color blocks, boucle and velvet fabrics, floral motifs, and the iconic Barbiecore.

# Dreamscape

# DREAMSCAPE

## YOUR DIGITAL OASIS

The new interior design trend of Dreamscape is influenced by the desire to escape the demands, disappointments, and pressures of the physical world while finding relaxation, fulfillment, and many times a new identity in the digital world. The rise of gaming, virtual reality, phygital interactions, and the metaverse developed in us a familiarity with digital visuals which have over time created an actual affinity for those types of aesthetics, because they can bring a sense of calm and escape. As with all trends, color is the foundation of interior design falling under this umbrella.

Blues, purples, greens, metallics, and black make up the Dreamscape palette. Mixed with these dreamy colors, are geometric shapes, magic eye reverberations, ethereal lighting, and flowing movements. Metallic touches, slick finishes, and precision designs are hallmarks of this interior design trend that generously embraces the stereotypical look of science fiction and futuristic ambience.

# SEIZE

the day

# SEIZE THE DAY

## LIVE FOR THE PRESENT

The trend of Seize The Day embodies the mindset of living in the moment while making space for nostalgia and comforting memories. It is about rediscovering traditional craftsmanship techniques and materials.

The color palette of Seize The Day is very earthy, focused on beiges, creams, light browns, and a fabulous terra cotta. Finishes and materials celebrate the beauty of desert dry touch and raw materials such as crude clay but with attention to comfort. There is also an emphasis on cords such as macramé, glazed tiles made from natural materials such as volcanic lava, and plenty of handcraft finishing. Forms and shapes draws inspiration from styles such as Modern Mediterranean and Southwestern Boho. They give life to tactile and comforting interiors by combining organic shapes, irregular and imperfect forms, and plenty of arches. Patterns also draw inspiration from dry and cracked earth and uneven natural surfaces.

# ESSENTIAL

*Luxury*

# ESSENTIAL LUXURY

## NEWLY DEFINED ELEGANCE

The notion of luxury has been changing, refreshing the traditional indicators of splendor. The trend of Essential Luxury is about enjoying moments of indulgence in a new way – blending beauty with heritage and pop culture; crafts with high-end technology and sustainability; multi-cultural inspiration with Art Deco and Gothic references.

Essential Luxury finishes and materials celebrate uniqueness, giving life to lavish and multi-ethnic spaces by combining precious stones, colorful marbles, and onyx with velvet, lacquered wood, and golden finishes. Forms and shapes draw inspiration mainly from the design of ancient civilizations, incorporating some Art Deco. Essential Luxury colors communicate richness and sophistication. Its color scheme explores dark shades and includes hues from Gothic style, black marble, precious red and green stones, and dark brown from prestigious wood. As for patterns, Essential Luxury focuses on exotic marble looks blended with animal print and tribal themes to create lavish and cozy interiors.

# TENDER LIVING

# TENDER LIVING

## WELL-BEING FOR ALL

Care and compassion find their voice through the Tender Living mindset that reclaims care to the fullest: care for self, others, and the planet. Tender Living fosters well-being, cocooning, inclusivity, and regeneration – expressing itself through Biophilic Design, multi-sensorial interaction, natural colors, sustainable practices, the beauty of imperfection, and neutral Scandinavian style.

Tender Living's color scheme supports us physically and mentally, stimulating mindfulness. Its palette includes variations of off-white, smooth grays and beiges, colors inspired by nature's rare beauty and slow crafts: green from deep forest to sage tones, sky and darker blues, burnet brown (think eggshells). Tender Living finishes and materials celebrate nature and stimulate our senses through organic and wavy shapes combined with fluted surfaces. This aesthetic also embraces imperfection, highlighting untreated surfaces such as exposed cement, kintsugi finishing, and texturized ceramics. Interiors combine Scandinavian Minimalism with Biophilic design – creating an Organic Modern style. A key hallmark of Tender Living is connecting with nature, both indoors and outdoors.

Laura Grilli

# LAURA GRILLI

DIRECTOR PRODUCT DESIGN

Design is an innate human need. The need to express our individuality artistically. The desire to surround ourselves with an environment that makes us feel good and helps bring joy and functionality to our daily lives.

My overriding goal as Daltile's Director of Product Design is to continually create tile products that are beautiful and innovative. A kind of beauty that helps people feel good in their homes, in their environments. Something they can enjoy, feel under their feet, touch with their hands. To create something fresh and new – that is my objective.

Our team works hard to ensure that our Daltile collections embody the essence of our tagline, "Imagine What's Possible". Giving to our customer, consumer or designer, the possibility of imagining something, seeing it materialize, seeing it come to life. Our products should be a tool to give anyone the possibility to exercise their creativity, their design skills, to obtain what they expect from each of their projects.
