BIRD'S EYE VIEW OF THE PROBLEM

God the Almighty Creator gave every human being born on this Earth inalienable rights to life, liberty, and the pursuit of happiness! This means that every human being, as long as they have breath and are breathing, have certain permanent, essential, natural rights including, but not limited to, adequate food, housing, clothing, health care, water, a safe living environment, equality, equity, and peace of mind; right to resist oppression; right to criticize the government; right to change or get rid of unfriendly, hostile, and abusive government and replace it with a new one that is ready to defend, protect, and secure the happiness and safety of the people; right to design new government to save the rights of the people from theft or being unjustly transferred or taken away by government or people of hate.

People of hate have gotten slick by taking over leadership positions in government and then create discriminatory laws and policies so that certain communities don't receive enough life-saving resources to help themselves be successful and keep them out of poverty and a life of crime. This practice is the new system of slavery and Jim Crow by which people of hate use to steal our God-given rights and take away our rights from us and claim that we are the criminals, that we are at fault for everything, that we ought to be reenslaved, that if we can't do the time, don't do the crime.

When Frederick Douglas and W.E.B. Dubois caught on to this, they said that this government have found new ways to reenslaved African Americans! Before their deaths, Dr King and Malcolm X said that this government was unjust, hypocritical, and hostile to the rights of Afrikan Americans!

In 2016, filmmaker Ava Davenary released a documentary called "13TH" that reveals how descendants of enslaved Africans were reenslaved on prison plantations by people of hate in government who enacted classist and racially discriminatory laws and policies that marginalized and criminalized them! Just recently, in 2020, Professor Angela Bell visited the Elyan Hunt Corrections Center and gave a presentation of the "13TH" which backed up everything revealed in Ava Davenary's film "13TH"!

Another documentary, Crack, Cocaine, Corruption, and Conspiracy, released in 2021 and directed by Stanley Nelson, reveals how the U.S. government acting through the CIA engaged in international drug trafficking in partnership with Nicaraguan Contras that led to a flood of cocaine and crack cocaine into African American communities spanning all 50 states...then launched a tough-on-crime war against African American people resulting in their mass incarceration!

BIRD'S EYE VIEW OF SOLUTION TO PROBLEM

The Need To Establish Black-Controlled Information & Strategy Centers With the Following Characteristics and Purposes:

- Be sufficiently sophisticated to detect and expose where appropriate, tax policies and administrative rulings that do harm to the economic prospects of most Blacks.
- Must be staffed by expert economists, sociologists, political strategists, and investigators sufficiently worldly and knowledgeable to challenge and refute the prescriptions issued by "think tanks" that ponder the problems of minorities and then unwittingly recommend public policies that perpetuate inequality and inequity to the disadvantage of Afrikan Americans.
- An important purpose of a Black intelligence agency is to shape the black political agenda and plan its tactics. The... agency would lay out the possible scenarios for winning and losing in particular political campaigns.
- Must discover the "open windows" where black political power can move in and share control of institutions and cities... devise political penalties and rewards to convert opponents of Black-backed legislation.
- Must...set straight the public record when Black politicians act irresponsibly or dishonestly and then blame their failure on racism.
- Must free themselves from the important constraint that much of what they now know, or are likely to know, is controlled by government and private media power, which at best, wants to help Blacks but is endemically opposed to empowering them. Just as Blacks must break the White monopoly of the means of production, they must also dismantle the White monopoly on information, the raw material for thinking and planning.
- The strategic purpose of the Black intelligence agency is to define what Blacks should do and how they might do it. With the aid of superb intelligence operations, American Blacks must develop a concrete and definite plan for achieving the five or ten things they must have to obtain parity in American society... Blacks... must prepare themselves for self-governance. The Black nation in the United States, like any other nation, will be no stronger than its information and intelligence.
