SILICA IN THE OILFIELD

Full Day Workshop

Wednesday, March 21, 8am-4pm

Auraria Campus Commons
777 Lawrence Street
Denver, Colorado

This full day seminar provides attendees with a comprehensive view of the health risks posed by silica, enterprise liabilities and a wide range of solutions to minimize the crystalline silica exposure during fracking operations. Agenda topics include historical perspective of NIOSH efforts toward silica exposure assessment during hydraulic fracturing operations, OSHA regulatory update, Enterprise future liability and legal aspects, silica hierarchy control methods, crystalline silica exposure assessment methods, and laboratory aspects of the crystalline silica samples analysis.

This event is being hosted by ASSE Colorado Chapter, and The Center for Health, Work & Environment at the Colorado School of Public Health. Event sponsors will be providing light breakfast and lunch.
