FLAX LILY

Dianella Tazmanica - Flax Lily

Liriope, low growing grass like ground cover flowering plants, adds structure to any landscape. With many foliage or bloom colors to choose from depending on your zone, Liriope varieties, in bare root form, are available to be shipped many places through common carrier.

AZTEC GRASS

LIRIOPE MUSCARI
'AZTEC GRASS'

USDA HARDINESS
ZONE: 7 - 11

Care Information:

Growing/Care Information: Water regularly during the first growing season to establish a deep, extensive root system. Takes mild drought, when established. Needs little care.

Type of Soil: Thrives in average, well-drained soils.

Light Needs: Partial Sun

Water needs:
Water weekly, or more often in extreme heat, until established.

Landscape Uses:
Border, Coastal Exposure, Container, Cutting Garden, Ground Cover, Mass Planting, Poolside, Urban Garden, Woodland Garden

Eye-catching grass-like perennial with green and silver variegated foliage. A tough and easy to grow edging for pathways and borders. Adds texture and color contrast in mixed beds or containers. Plant in mass for great effect.

Plant type:Ground-cover, Perennial
Deciduous/evergreen:Evergreen
Sunset climate zones:2 - 10, 14 - 24
Growth rate:Moderate
Average landscape size:Reaches 15 inches tall and wide, spreading by rhizomes.

Special features:Dramatic Foliage Color, Easy Care, Pet Friendly, Waterwise, Year-round Interest.

Blooms:Summer
Flower color:Purple

BIG BLUE

LIRIOPE MUSCARI
'BIG BLUE'

USDA HARDINESS
ZONE: 5/6-10

Care Information:

Growing/Care Information: Follow a regular watering schedule during the first growing season to establish a deep, extensive root system. Tolerates mild drought, when established. For a neat appearance, remove old foliage before new leaves emerge. Cut back late winter.

Type of Soil: Thrives in average, well-drained soils. Moderately salt tolerant.

Light Needs: Partial Sun

Watering Needs:
Best with regular watering - weekly, or more often in extreme heat.

Landscape Uses:
Border, Coastal Exposure, Container, Cutting Garden, Edging, Erosion Control on banks and slopes, Fire-scaping / Fire Wise, Ground Cover, Mass Planting

Abundant lavender flower spikes rise above the attractive, tufted arching, grass-like foliage followed. Superior edging, border or ground-cover. Tolerates drier conditions when established.

Plant type:Groundcover, Perennial
Deciduous/evergreen:Evergreen
Sunset climate zones:2 - 10, 14 - 24
Growth rate:Moderate
Average landscape size:Grows 12 to 15 in. tall and wide.

Special features:Easy Care, Ornamental Berries, Pet Friendly, Water-wise

Foliage color:Green
Blooms:Summer
Flower color:Blue

CHRISTMAS TREE

LIRIOPE MUSCARI
'CHRISTMAS TREE'

USDA HARDINESS
ZONE: 6 - 10

It has 1/2 wide, green leaf blades and Lavender flowers that spike like Christmas trees mid-Summer followed by near black berries.

Plant type:Perennial
Deciduous/evergreen: Evergreen

Height: 12-15 Inches
Spread: 12-18 Inches

Growth rate: rapid spread

Foliage color: Evergreen
Smooth-Textured.

Blooms: Late Summer/Early Fall
Flower color: Violet/Lavender.

Care Information:

Growing/Care Information: Cut back late winter. Proves to be an outstanding, low-maintenance accent or borders plant. When planting liriope, do not install plants too deeply where the crown of the plant is buried. Keep liriope healthy by watering weekly as needed during summer droughts, don't over-apply mulch next to plants, and don't over-fertilize. When fertilizing, scatter fertilizer around plants but don't let fertilizer granules become wedged between leaves. These things can all stress and predispose liriope plants to become infected with leaf and crown rot. Do not plant liriope in poorly drained sites.

Type of soil: moderately salt tolerant plant. Well-drained to dry, average to poor, pH 4.5 to 6.4.

Light Needs: requires shade. Partial shade to full shade.

Watering Needs: Drought-tolerant; suitable for xeriscaping.

Landscape Uses: perfect for borders, edging and mixed beds, erosion control on banks and sloping terrain, large bed plantings and in woodland gardens.

DENSIFLORA

LIRIOPE MUSCARI
'DENSIFLORA'

USDA HARDINESS
ZONE: 6 -10

Densiflora, with its slim lily-like emerald foliage (3/8-1/2 inch wide), is a dense cluster with showy lavender flower spikes that resemble miniature grape hyacinths. Relatively adaptable to a variety of environments.

Plant type:Perennial
Deciduous/evergreen: Evergreen

Height: 18" - 22" Inches
Spread: 12" - 18" Inches

Growth rate: moderate

Foliage color: dark green leaf blade

Blooms: Late Summer/Early Fall
Flower color: Lavender.

Care Information:

Growing/Care Information: Allow seed-heads to dry on plants; remove and collect seeds
Seed does not store well; sow as soon as possible.
Space 12 inches to 15 inches apart.

Type of soil: moderately salt tolerant plant. Well-drained to dry, average to poor, pH 4.5 to 6.4. Prefers moist, loamy, sandy or clay soil

Light Needs: Full sun to full shade.

Watering Needs: Drought-tolerant; suitable for xeriscaping

Landscape Uses: perfect for borders, edging and mixed beds, erosion control on banks and sloping terrain, large bed plantings and in woodland gardens. Xeriscaping, container gardens, accent plants, and borders.

DWARF MONDO GRASS

OPHIOPOGON JAPONICUS 'NANA'

USDA HARDINESS ZONE: 6 - 11'

Care Information:

Growing/Care Information: Follow a regular watering schedule during the first growing season to establish a deep, extensive root system. For a neat appearance, remove old foliage before new leaves emerge.

Type of Soil: Thrives in humus-rich, well-drained soils, with consistent moisture.

Light Needs: Filtered sun

Watering Needs:
Water regularly, when top 3 in. of soil is dry.

Landscape Uses:
Border, Coastal Exposure, Container, Edging, Ground Cover, Rock Garden, Woodland Garden

This dwarf variety, only half the size of others, creates a lush ground-cover of dense, dark green grass-like clumps. Excellent as an edging plant or tucked into rocks for a pleasing contrast. Striking in mass plantings in the landscape. Evergreen.

Plant type:Perennial, Groundcover
Deciduous/evergreen:Evergreen
Growth rate:Slow
Average landscape size:Slow growing clumps, only 4 to 6 in. tall.
Special features:Dwarf Plant, Easy Care
Foliage color:Green
Blooms:Summer
Flower color:Purple

EVERGREEN GIANT

LIRIOPE MUSCARI

USDA HARDINESS
ZONE: 4 - 10

A popular garden solution for edging paths and gardens or underplanting around trees. This tough but showy evergreen ground-cover has deep green, grass-like foliage arranged in slightly upright tufts. Spikes of purplish bell-shaped flowers resembling grape hyacinth appear in summer, followed by dark berry-like fruits. Great for edging pathways or as and a low border accent. Grows well underneath trees or between shrubs.

Plant type:Groundcover
Deciduous/evergreen:Evergreen
Growth habit:Spreading
Average landscape size:Foliage reaches 10-16 in. tall and slightly wider; spreads by clumping.

Special features:Easy Care, Ornamental Berries, Pet Friendly, Tolerates Urban Pollution, Waterwise, Year-round Interest

Foliage color:Green
Blooms:Late Summer
Flower color:Purple

Care Information:

Growing/Care Information: As a ground cover, shear back in spring with a sharp lawn mower blade to encourage a flush of new growth.

Type of Soil: Highly adaptable, but prefers well-drained, loamy sandy or clay soils. Tolerates mild drought, when established.

Light Needs: Partial shade to partial sun

Watering Needs:
Water regularly weekly- or more often in extreme heat.

Landscape Uses:
Border, Coastal Exposure, Container, Cutting Garden, Edging, Erosion Control, Ground Cover, Mass Planting, Urban Garden, Woodland Garden

JOHN BIRCH

LIRIOPE MUSCARI
'JOHN BIRCH'

USDA HARDINESS
ZONE: 5/6-11

A thick, clumping, grass-like member of the Lily Family. It features golden, variegated, arching, slightly twirled leaves and lavender, grape-colored, hyacinth-like flowers spikes. It has, ½" wide, variegated leaf blades, green with yellowish-white margins. John Burch Liriope stays in clump form. It does not spread by rhizomes. Lavender cox-combed shaped flower spikes- Mid-Summer

Plant type:Perennial
Deciduous/evergreen: Evergreen

Height: 12-15 Inches
Spread: 12-18 Inches

Moderate growth rate

Foliage color: Variegated, Gold, Green
Blooms: Summer
Flower color: Lavender.

Care Information:

Growing/Care Information: It has less variegation when planted in the shade. Deer tend to avoid it. This ground-cover is nicely textured and low-maintenance in both sun and shade; in southern zones, its preference is some shade. To maintain John Birchs' most attractive appearance, mow (or cut back its tops) in late winter or very early spring before new growth emerges - its crowns may impede otherwise.

Type of soil: performs best in well-drained acidic soils. It has good performance in partially shaded areas with moist soil. Moderately salt tolerant.

Light Needs: Full sun, Part sun, Full shade.

Watering Needs:
tolerates drought, poor soil, heat, humidity, slopes, and damp areas.

Landscape Uses:
This plant is almost indestructible in stubborn areas; it is perfect for banks, beds, and borders, or at trees bases (where roots impede other grass). Outstanding for erosion control.

MONDO GRASS

LIRIOPE OPHIOPOGON JAPONICUS

USDA HARDINESS ZONE: 6 - 11

Attractive clumps of stemless dark green grass-like leaves make a beautiful small-scale ground-cover or low border. Tiny spikes of lilac flowers appear in summer. This care-free, easy to grow perennial is ideal for adding texture to the garden. Evergreen. Despite its name, this is more of a Lily-like plant than a true grass. It is the traditional ground-cover of the Japanese garden, planted at the base of pagoda lights and stone basins.

Plant type:Perennial, Groundcover
Deciduous/evergreen:Evergreen
Sunset climate zones:5 - 9, 14 - 32
Growth rate:Moderate
Average landscape size:Moderate grower to 12 to 15 in. tall and wide.

Special features:Easy Care, Ornamental Berries

Foliage color:Green
Blooms:Summer
Flower color:Purple

Care Information:

Growing/Care Information: Follow a regular watering schedule during the first growing season to establish a deep, extensive root system.

Type of Soil: Provide moist, well-drained soil. Best in part shade in hot summer climates.

Light Needs: Partial to full sun

Watering Needs:
Needs regular watering - weekly, or more often in extreme heat.

Landscape Uses:
Border, Coastal Exposure, Ground Cover, Rock Garden, Woodland Garden.

MONROE WHITE

LIRIOPE MUSCARI
'MONROE WHITE'

USDA HARDINESS
ZONE: 5/6 - 10

Care Information:

Growing/Care Information: Follow a regular watering schedule during the first growing season to establish a deep, extensive root system. For a neat appearance, remove old foliage before new leaves emerge. Cut back late winter. Cut old leaves down to the ground in spring to encourage fresh foliage

Soil Type: Grows best in acidic soils, dry soil.

Light Needs: Required partial to full shade.

Watering Needs:
Once established, needs only occasional watering.

Landscape Uses: Coastal Exposure, Cutting Garden, Edging, borders and mixed beds, erosion control on banks and slopes, large bed plantings, Firescaping/Fire Wise, Ground Cover, Woodland Garden.

Large spikes of white flowers stand out against dense clumps of dark, forest green foliage. A rugged perennial that is a popular edging plant and in colonies or masses for a lush non-spreading ground-cover.

Plant type:Groundcover, Perennial
Deciduous/evergreen:Evergreen

Growth rate:Fast

Height: 12"-15" inches
Spread: 12" - 18"

Special features:Bird Friendly, Easy Care, Fast Growing, Ornamental Berries, Pet Friendly, Waterwise, Year-round Interest

Foliage color:Dark Green
Blooms:Summer
Flower color:White

ROYAL PURPLE

LIRIOPE MUSCARI
'ROYAL PURPLE'

USDA HARDINESS
ZONE: 5/6 - 10

Care Information:

Growing/Care Information: Follow a regular watering schedule during the first growing season to establish a deep, extensive root system. For a neat appearance, remove old foliage before new leaves emerge. Cut back late winter.

Soil type: Moderately salt tolerant. Normal, sandy or clay soil with a neutral or Acid pH, average or moist type soil.

Light Needs: Partial sun

Watering Needs:
Needs regular watering - weekly, or more often in extreme heat.

Landscape Uses:
Border, Coastal Exposure, Cutting Garden, Firescaping/Fire Wise

Spikes of deep purple flowers rise above the arching, dark green, grasslike foliage followed by black berries. A superb edging or border plant for partially shaded areas. Tolerates drier conditions when established.

Plant type:Groundcover, Perennial
Deciduous/evergreen:Evergreen
Growth rate:Fast
Average landscape size: A fast growing ornamental grass growing 12 to 15 inches tall. Spread: 12"-18" inches.

Special features:Easy Care, Pet Friendly, Waterwise

Foliage color:Dark Green
Blooms:Summer
Flower color:Purple

SAMANTHA

LIRIOPE MUSCARI
'SAMANTHA'

USDA HARDINESS
ZONE: 6 - 10

A very hardy pink flowering Liriope with a clumping habit. Stems of bell-shaped pink flowers from early summer to autumn. Attractive flower, attractive foliage, shade tolerant, ornamental, non-poisonous to animals and humans. True pink flower spikes rise above very dark-green foliage during summer, followed by attractive black berries. A tough, no maintenance, and good looking plant,

Plant type:Groundcover, Perennial

Deciduous/evergreen:Evergreen
Growth rate: Medium

Average size: H:6"-12"
W:9"-12"

Special features:

Foliage color:
Blooms:Summer / Fall
Flower color: Pink

Care Information:

Growing/Care Information: prefers a moist but well-drained loose soil however will grow in most any average soil. When established it is quite drought tolerant and only requires supplemental irrigation during prolonged periods of severe drought. In the South, green-leaf varieties of Liriope muscari tend to look and perform better with some afternoon shade. Protect from snails. Fertilise in early Spring and remove any unwanted scruffy leaves

Soil type: Average, Well-Drained

Light Needs: can be grown well in a sunny position or in part to moderately heavy shade

Watering Needs: water regularly

Landscape Uses: best suited for use in rockeries and borders. It is very useful in mass plantings under trees and in other part sun to shady areas. This is a groundcover plant highly suitable for home foundation plantings. It can also be used singly or in combination with other plants in container gardens where it adds a very nice vertical accent and grassy texture.

SILVERY DRAGON

LIRIOPE SPICATA
'SILVER DRAGON

USDA HARDINESS
ZONE: 6 - 11'

A versatile evergreen perennial with dark green, narrow, grass-like foliage highlighted by silvery-white vertical striping. Pale purple flowers are followed by whitish green berries. An effective accent as a ground-cover or edging.

Plant type:Groundcover, Perennial
Deciduous/evergreen:Evergreen
Growth rate:Moderate
Average landscape size:Grows to 10 in. tall, spreading 15 to 18 in. wide.

Special features:Deer Resistant, Dramatic Foliage Color, Easy Care, Ornamental Berries, Pet Friendly, Year-round Interest

Foliage color: variegated
Flower color: lavender

Care Information:

Growing/Care Information: Once established, needs less frequent watering; supplement in extreme heat. Needs little care. Pruning time: winter.

Type of Soil: Thrives in average, well-drained soils.

Light Needs: Partial sun

Watering Needs:
Best with regular water - weekly, or more often in extreme heat.

Landscape Uses:
Border, Coastal Exposure, Container, Cutting Garden, Edging, Firescaping/Fire Wise, Ground Cover, Houseplant, Woodland Garden.

SILVER MIDGET

LIRIOPE MUSCARI 'SILVER MIDGET'

USDA HARDINESS ZONE: 5/6-10

It has ½" wide, variegated leaf blades, green with Yellowish to white, irregular margins. Blooms with full, lavender, cox-comb shaped flower spikes mid-Summer. Silver Midget Liriope stays in clump form. It does not spread by rhizomes. It produces dark, evergreen foliage with irregular white variegation. Blades are about 3/8 inch wide. Lavender flowers are produced on cockscomb-shaped spikes. 'Silver Midget' spreads slowly.

Plant type:Perennial
Deciduous/evergreen:Evergreen

Height: 10-12 Inches
Spread: 12-18 Inches

Features: Drought tolerant, low maintenance, irregularly variegated foliage, slow to spread.

Foliage color: Variegated, White, Green
Blooms: Late Summer
Flower color: Lavender.

Care Information:

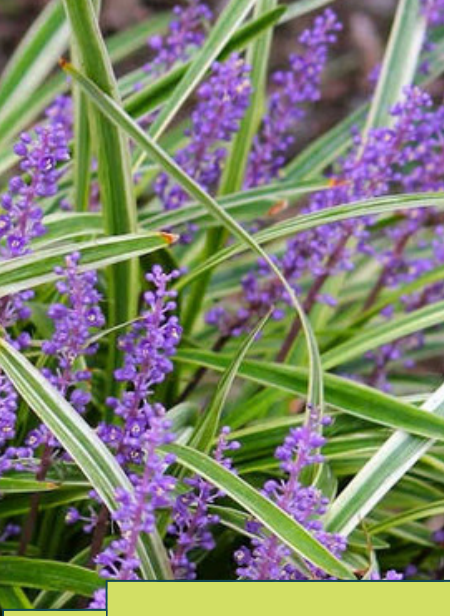
Growing/Care Information: 'Silver Midget' is drought tolerant and low maintenance. Cut back late winter.

Type of Soil: Average well-drained garden soil is fine. It adapts to a wide variety of soil types with pH ranging from 4.5 to 6.4.

Light Needs: Full Sun, Partial Sun, Full Shade

Watering Needs:
Adapts well to dry or moist conditions

Landscape Uses:
perfect for borders, edging and mixed beds. Also used for erosion control on banks, slopes, large bed plantings and in woodland gardens. Shorter than other Liriopes, makes a good low border or edging. It is fine for ground cover in small areas, container gardens and borders.



SILVERY SUNPROOF

LIRIOPE MUSCARI
'SILVERY SUNPROOF'

USDA HARDINESS
ZONE: 6 - 11'

Bold striped foliage and flower spikes of soft lilac highlight this evergreen perennial. Fuss-free and adaptable, resistant to insects and disease, and tolerant of heat and humidity when established. Takes sun in cool summer climates; part sun to shade anywhere. Excellent as ground-cover, edging a walk or a filler in a tub planting.

Plant type:Perennial
Deciduous/evergreen:Evergreen
Growth rate:Moderate
Average landscape size:Clumping, blade-like foliage 15 to 18 in. tall and wide.

Special features:Deer Resistant, Dramatic Foliage Color, Easy Care, Improved Disease Resistance, Pet Friendly, Waterwise

Foliage color:Variegated
Blooms:Summer
Flower color:Purple

Care Information:

Growing/Care Information: Follow a regular watering schedule during the first growing season to establish a deep, extensive root system. Tolerates mild drought once established, but looks best with supplemental watering during hot, dry spells. For a neat appearance, prune old foliage before new leaves emerge in spring.

Type of Soil: Normal, sandy or clay. Soil pH: Neutral or Acid.

Light Needs: Partial sun

Watering Needs:
Water regularly- weekly or more often in extreme heat.

Landscape Uses:
Border, Coastal Exposure, Container, Cutting Garden, Dry Shade, Edging, Firescaping/Fire Wise, Ground Cover.

SPICATA

LIRIOPE MUSCARI
' SPICATA '

USDA HARDINESS
ZONE: 4/5 - 10

Care Information:

Growing/Care Information: Follow a regular watering schedule during the first growing season to establish a deep, extensive root system. As a ground-cover, space plants 2 ft. to 3 ft. apart, (closer for faster coverage). Control weeds with mulch until the plants cover the area.

Type of Soil: moderately salt tolerant plant. Normal or sandy soil with a neutral or acid composition and dry in texture.

Light Needs: Partial sun

Watering Needs:
Needs regular watering - weekly, or more often in extreme heat.

Landscape Uses:
Coastal Exposure, Cutting Garden, Fire-scaping/Fire Wise, Woodland Garden, good for erosion control and used for sloping terrain. Not recommended for borders or mixed beds but good for contained large bed plantings.

A vigorous, creeping grass-like plant with pale lavender flowers that stand just above the foliage. In fall, the blooms are followed by spikes of black berries. Fast spreading plant for ground-cover or border. Has

Plant type:Groundcover, Perennial
Deciduous/evergreen:Evergreen
Sunset climate zones:3 - 10, 14 - 24
Growth rate: Fast
Average landscape size:Vigorous growth.

Height: 12" - 15"
Spread: 12"-24"

Special features:Easy Care, Pet Friendly

Foliage color:Dark Green
Blooms:Summer to early fall
Flower color:White

SUPER BLUE LIRIOPE

LIRIOPE MUSCARI 'SUPER BLUE'

USDA ZONES 6 TO 11

Super Blue Liriope is an evergreen herbaceous perennial that averages 18 to 24 inches in height with a comparable spread. It is a grass-like clump grower, spreading by rhizomes and suckers. It has a moderate growth rate. It is a slightly taller-growing cultivar of Liriope.

Leaves are evergreen, linear-shaped, simple, 18 to 24 inches long and ½ inch wide with entire margins, and dark green in color. It has parallel veins and the leaves arise directly from the ground.

Plant TypePerennial
Growth RateFast

Height: 18"-20" / 45.7cm - 50.8cm
Width: 18"-28" / 45.7cm - 71.1cm

Bloom Time: Summer, Late Summer, Early Fall

Foliage Color: Dark Green

Flower ColorBlue Violet

Care Information:

Growing/Care Information: Little pruning is required other than clipping off dead leaves to keep it tidy. The light purple/blue flowers are about 1/4 inch across and are borne in spikes. It blooms primarily from spring to fall.

Type of Soil: prefers a slightly acid soil, but it will grow on a wide variety of well-drained soils in a pH range of 5.5 to 7.5.

Light Needs: Partial Sun, Partial Shade, Full Shade

Watering Needs:
It has good drought tolerance once established, so minimal watering is needed for survival in dry spells. As with most plants, though, ample irrigation in droughts keeps it healthier and looking better.

Landscape Uses:
Groundcover, containers, borders, companion plant, shady areas

VARIEGATED

LIRIOPE MUSCARI
'VARIEGATA'

USDA HARDINESS
ZONE: 5/6 - 11

Care Information:

Growing/Care Information: Follow a regular watering schedule during the first growing season to establish a deep, extensive root system. Tolerates mild drought, when established. For a neat appearance, remove old foliage before new leaves emerge. Cut back late winter.

Type of Soil: Thrives in average, well-drained soils. Moderately salt tolerant.

Light Needs: Partial sun

Watering Needs:
Needs regular watering - weekly, or more often in extreme heat.

Landscape Uses:
Border, Coastal Exposure, Cutting Garden, Firescaping/Fire Wise, Mass Planting, Woodland Garden

Variegated leaf blades. Vibrant yellow stripes brighten the dark green arching, grass-like foliage that adds color to any planting. Lilac flowers appear on stems as tall as the leaves. Easy to grow, clump-forming ground-cover or edging around perennial or shrub borders.

Plant type:Perennial
Deciduous/evergreen:Evergreen
Sunset climate zones:8
Growth rate:Moderate
Average landscape size:Moderate growing 15 in. tall and wide.
Spread: 12"-18" inches.

Special features:Bird Friendly, Dramatic Foliage Color, Easy Care, Pet Friendly, Waterwise, Year-round Interest

Foliage color:Variegated
Blooms:Late Summer
Flower color:Purple

VARIEGATED MONDO GRASS

OPHIOPOGON PLANISCAPUS 'VARIEGATA'

USDA HARDINESS ZONE: 6 - 9

Care Information:

Growing/Care Information: Follow a regular watering schedule during the first growing season to establish a deep, extensive root system.

Type of Soil: Best grown in humus-rich, well-drained soils with consistent moisture. Provide sheltered location in Zone 6.

Light Needs: Partial shade to full sun

Watering Needs:
Needs regular watering - weekly, or more often in extreme heat.

Landscape Uses:
Border, Container, Mass Planting, Poolside, Woodland Garden

Vibrant, easy to grow perennial plant with eye-catching, variegated grass-like foliage. Makes an excellent edging plant and adds great color contrast to mass plantings, mixed borders and containers.

Plant type:Ornamental Grass, Perennial
Deciduous/evergreen:Evergreen
Growth rate:Slow
Average landscape size:Grows slowly to 5 to 6 inches tall and spreading.

Special features:Deer Resistant, Dramatic

Foliage Color, Easy Care
Foliage color:Variegated
Blooms:Summer

WEBSTER WIDELEAF

LIRIOPE MUSCARI 'WEBSTER WIDELEAF'

USDA HARDINESS ZONES 7 TO 11

The dense clump-forming 'Webster Wideleaf' has some of the broadest leaves of any lilyturf. A grass-like evergreen perennial. It has long and blade-like leaves that grow in lax, fountain-like, spreading clumps. This selection has dense spikes of lavender flowers that appear in late summer. These are followed by black berry-like fruits that appear in fall and are eaten and spread by birds.

Plant TypePerennial

Height: 12"-15" / 30.5cm - 38.1cm
Width: 18"-28" / 45.7cm - 71.1cm

Bloom Time: Summer, Late Summer, Early Fall

Growth Rate: Medium
Habit: Clump-Forming
Seasonal Interest: Spring, Summer, Fall, Winter

Flower Color: Lavender

Care Information:

Growing/Care Information: The evergreen leaves can appear weather beaten with time. When this happens it is best to shear or mow plants back in fall or early spring to allow new fresh leaves to emerge.

Type of Soil: Grows best in good soil with average moisture but tolerates poor soils and dry conditions.

Light Needs: Partial Sun, Partial Shade, Full Shade. It prefers partial shade, but it will tolerate full sun. One of its greatest benefits is its shade tolerance. It grows readily in partial or full shade and creates a good ground-cover under trees.

Watering Needs:
It has good drought tolerance once established, so minimal watering is needed for survival in dry spells. As with most plants, though, ample irrigation in droughts keeps it healthier and looking better.

Landscape Uses:
Groundcover, containers, borders, companion plant, shady areas.

DIANELLA TASMANICA

FLAX LILY
'DIANELLA TASMANICA'

USDA HARDINESS
ZONE: 7 - 11

Flax Lily is an evergreen herbaceous perennial that averages 18 to 24 inches in height with a comparable spread. It is upright in growth habit forming clumps arising from rhizomes. It has a moderate growth rate.

Leaves are evergreen, strap-shaped, 12 to 24 inches long by 3/4 to 1 inch wide, finely serrate margined, and green to blue/green in color. They grow in a fan-like spray that arches and arises from rhizomes.

Plant type:Perennial
Deciduous/evergreen:Evergreen
Growth habit:Compact
Growth rate:Fast
Average landscape size:Clumps to 18-24 in. tall and wide; flower spikes to 3 ft. tall.

Special features:Compact Form, Easy Care, Fast Growing, Ornamental Berries, Waterwise, Year-round Interest

Foliage color: variegated

Care Information:

Growing/Care Information: Follow a regular watering schedule to establish a deep, extensive root system. Best in shade in hot summer regions. For a neat appearance, prune spent flower stalks and old foliage as new leaves emerge.

Type of Soil: Grows easily in enriched, well-drained soils, from sandy to clay. Sandy, Loamy, Sandy loam, Clay loam, Potting mix.

Light Needs: Pull shade to full sun.

Watering Needs:
It has moderate drought tolerance, but it will look better with irrigation in dry spells. It doesn't like to be overwatered. Once established, needs only occasional watering.

Landscape Uses:
Border, coastal exposure, dry shade, mass planting. Low maintenance garden, courtyard, poolside, container growing, coastal garden,
