

# OUTDOOR DESIGN PROCESS

Whether you're starting with a blank slate or have ideas in motion, we're happy to begin the design consultation process wherever you are. We collaborate with clients at all stages—from initial brainstorming and reviewing construction documents to refining an existing outdoor layout. Our goal is to meet you where you are.

---

## 1. PHASE ONE: CONCEPT DESIGN

- Site analysis and client consultation including a thorough design consultation. Concept design featuring an outdoor layout. Design presentation with 3D renderings and scaled design plan, along with detailed construction documents.

## 2. PHASE TWO: DEVELOPMENT PLANS

- We provide precise plans, elevations, and construction documents to ensure that the design vision is seamlessly integrated into the construction process. This comprehensive approach includes, but is not limited to:

- Site plans
- Plumbing plans
- Equipment specifications
- Pool lighting and electrical plans
- Permit plans and health department plans
- Hardscape design plans
- Landscape design plans
- Landscape lighting
- Irrigation plans
- Material specifications and construction notes
- Structure design plans

## 3. PHASE 3: CONSULTATION & CONSTRUCTION OBSERVATION

- Residential and commercial construction requires attention to detail during every step of the process, including the implementation of construction documents. We are happy to work with you at key points of construction, to ensure that the process is going as intended.
