

```
; Exercise 8 - Loop Count 1..10
; Purpose: Count from 1 to 10 and store results in memory.
; #belleswhoshell.ca
```

```
section .data
out times 10 dd 0
```

```
section .text
global _start
```

```
_start:
    ; TODO: set counter, loop from 1 to 10, store into out

    ; exit
    mov eax, 60
    xor edi, edi
    syscall
```
