

Capability Statement

Core Competencies

E.R.R.T. Services L.L.C. delivering interoperable, API-driven technology solutions that enable secure, seamless data transfer across systems and eliminate data silos.

We specialize in designing, developing, and managing advanced information systems, providing R&D, and delivering consulting that enhances mission performance and operational readiness.

- Custom software development and system integration
- Enterprise and cloud systems design
- Data center and IT infrastructure management
- Applied R&D in engineering and life sciences
- Technical and scientific consulting services
- Delivered AI-enabled solutions for systems

Differentiators

ERRT Services LLC is a Virginia-registered apprenticeship sponsor for software development and AI training, enabling a scalable workforce model that develops mission-ready talent while delivering technical solutions. This approach aligns directly with federal and state workforce priorities to expand capabilities in high-demand areas such as artificial intelligence, cybersecurity, and digital services.

While Registered Apprenticeship Programs are nationally promoted as a critical solution to the technology skills gap, **less than 1% of U.S. employers participate in registered apprenticeships**—and even fewer focus on software and AI. This positions ERRT as a highly differentiated partner capable of delivering both innovative IT solutions and sustainable workforce pipelines, reducing long-term dependency on scarce technical talent.

Past Performance

Relevant Government Past Performance (Subcontractor)

State Department of Motor Vehicles (DMV)

Timeframe: 2018 – 2021

Description of Work:

Provided IT application and data systems support services for a state government motor vehicle agency, supporting mission-critical systems used to deliver public services.

NAICS: 541512 – Computer Systems Design; 541511 – Custom Computer Applications

State Department of Transportation (Subcontractor)

Prime Contractor: Ford Resource Group

Timeframe: 2017 – 2019

Description of Work:

Delivered technical and analytical IT application support services for a state transportation agency, supporting systems analysis and data-related operations.

NAICS: 541512 – Computer Systems Design; 541511 – Custom Computer Applications

Company Data

Company History:

ERRT Services LLC was established to deliver practical, data-driven technology solutions to government and commercial clients. The company is led by a veteran executive with experience as a college professor, combining academic rigor with real-world systems and analytics expertise. ERRT Services applies disciplined, mission-focused execution to support transportation, regulatory, and public-sector operations.
