

Returning To Work Guide

With the green light once again given to our industry, the safety of our customers and team is always at the core of CCE Rentals, especially now. We have been working diligently on implementing our new process of operations with enhanced safety standards. By utilizing industry-leading standards and recommendations of Health Canada we are prepared and are now reopened for business.

This return to work guide details our new operational processes, encircled around three main criteria:

- **Spatial Prioritization** - While we have restarted outdoor projects, in-shop projects continue to be organized in such a way that each member is a minimum of 6 ft apart.
- **Protective Gear Utilization** - Adequate protective gear has been issued to our team for in shop and outdoor project use. Protective gear will be worn at all times while on site.
- **Sanitization** – We’ve implemented thorough daily sanitization of our equipment and facilities with great emphasis placed on deep sanitization of rental equipment before and after rental, to protect our team and valued customers.

As things progress and situations change there will be continued adaptations to our protocols. We will keep our valued customers updated every step of the way. Stay safe and remember; **“We’re In This Together!”**
