

Trebbiano; premium glass solution Cubistic look, maximum benefits

The Trebbiano is a stunning addition to any garden or terrace. It features elegant shapes and modern solutions for connecting indoor and outdoor spaces. Utilising a glass roof with a maximum span of seven metres between two posts, the Trebbiano provides all the benefits of a wall-mounted veranda and a flat-roofed pergola.

Trebbiano

The Trebbiano; a stylish option for British homes

The flat-roofed Trebbiano solution is ideal for buildings with less available space to fit lean-to verandas. With the possibility of installing it on bungalows and under low-pitched roofs, the Trebbiano offers an affordable option to maximise your outdoor space. The firmly reinforced glass allows for an unobstructed view of the sky. Additionally, its straight roofed design adds versatility, allowing it to function effectively as a carport.
