**Telehealth is NOT a product,
it's a STRATEGY**

Our Telehealth solution is built on the foundation of reimbursement and compliance.

We are a team of doctors and nurses, who understand the importance of a sustainable Telehealth program.

We understand that having your own Telehealth program allows you to provide care for your own patients and improve continuity of care and health outcomes.

Here's what we can do for you.

Assessment and Customization

We conduct a gap analysis to define the nature and scope of your Telehealth needs based on your practice specialty and patient population.

We create an **implementation guidebook customized** to your needs.

HIPAA Compliant Platform

We provide your practice with a HIPAA compliant web-based Telehealth platform.

We provide **Guidance and support** with setting up your Telehealth application.

Customized Training

We provide training for the clinical providers, administrative and billing staff.

Customized training includes:

- Best practice recommendations on operational workflows
- **Customized explainer video** to send to your patients on how to use the Telehealth application.

Reimbursement Guidance

We provide guidance with Telehealth reimbursement requirements such as:

- **Proper Documentation and**
- **Accurate Billing**

We can provide assistance with billing and denied claims through our Revenue Optimization Package.

REVENUE OPTIMIZATION PACKAGE

There are more than 100 Telehealth billable codes. Ask us about adding the **Revenue Optimization Package** to your Telehealth program.

We provide an **in-depth assessment** and determine ways you can expand your Telehealth program to optimize your practice's capabilities.
