Climate-neutral company

To ensure sustainable development, an important aspect for us is to take a holistic view of the three components: economics, environment and society. In collaboration with Climate Partner, our factory in Fischerbach, Germany is 100% climate-neutral – this includes the processing of all uma pens. The unavoidable emissions are compensated through climate protection projects. We consciously focus on investing in our region. The forest protection project in Freiburg aims to protect our valuable rural environment.

Facts:

- Emissions of 3,362,777 kg CO₂ compensated to date
- 100% climate-neutral processing in Fischerbach
- 25 UMA product collections manufactured, processed and delivered climate-neutrally

- > Ruler (7 cm)
- > Screw Driver
- > Stylus Tip
- > Solid Bamboo

- > Bamboo eternity pencil writes upto 20,000 metres
- > Replaces 100 traditional wooden pencils
- > No sharpening needed

WIEN 877 - ETERNITY

eco-neutral Bamboo eternity pencil replaces your traditional wooden pencil. Traditional wooden pencils write only up to around 200 metres, but this bamboo eternity pencil, has a writing length of up to around 20,000 metres using a graphite tip to produce a graphite line. Not only does it write like a pencil, but the markings can be erased. It works by leaving a graphite line on paper just like a regular traditional wooden pencil but it wears down so slowly, that it should outlast up to 100 traditional wooden pencils!

Print Technique : UV, SC, ENG

code to watch
product video

How the card holder protects?

The aluminium Cardprotector protects your most important plastic cards not only against bending and breaking, but also against malicious parties reading your RFID and NFC cards. RFID (Radio Frequency Identification) cards contain a chip and an antenna for wireless communication. Examples of RFID cards include the Travel card, ID cards, the latest generation of credit cards and bank cards, as well as various access passes.

Using the Cardprotector

The Cardprotector can hold a maximum of 7 cards. If only embossed cards are used, the capacity is 5 cards. Position the cards you use the most at the back or front and they will slide out sufficiently to be used. Slide out the cards with ONE movement of the slider on the side. The radio signal, although still greatly reduced, will now be sufficient for contact over a short distance. This means that you can use your RFID-NFC cards easily and securely. After use, slide your cards back into the Cardholder by pressing down on them lightly.
