## PRESENTING A WALLET THAT PROTECTS AGAINST FRAUD IN THE NEW WI-FI ERA.

### How the card holder protects?

The aluminium Cardprotector protects your most important plastic cards not only against bending and breaking, but also against malicious parties reading your RFID and NFC cards. RFID (Radio Frequency IDentification) cards contain a chip and an antenna for wireless communication. Examples of RFID cards include the Travel card, ID cards, the latest generation of credit cards and bank cards, as well as various access passes.

### Using the Cardprotector

The Cardprotector can hold a maximum of 7 cards. If only embossed cards are used, the capacity is 5 cards. Position the cards you use the most at the back or front and they will slide out sufficiently to be used. Slide out the cards with ONE movement of the slider on the side. The radio signal, although still greatly reduced, will now be sufficient for contact over a short distance. This means that you can use your RFID-NFC cards easily and securely. After use, slide your cards back into the Cardholder by pressing down on them lightly.

Dryncool is an advanced Moisture Management system (MMS) that helps keep the skin cooler & drier - more comfortable by transporting sweat to outer layer.

Executive wear.

Premium quality.

No-fuss performance.

Creaseless.

UV protection fabrics are rated between UPF 25-39.

Ultraviolet protection factor (UPF) measures blockage of UV-A and UV-B rays. A UPF rating of 25-39 means that our fabric allows 1/25th to 1/39th (2.56- 4%) of UV radiation that falls on the surface of the fabric to pass through it. Thus 96-97.4% of UV rays are not allowed to reach your skin thereby protecting the skin from sunburn and long term skin damage.

# Sustainability and Transparency Organization and Certification

## Global Recycle Standard (GRS)

The Global Recycled Standard (GRS) is an international, voluntary, full product standard that tracks and verifies a product's recycled content, chain of custody, social and environmental impact and chemical restrictions.

The objective of the GRS is to define requirements to ensure accurate recycled content claims.

## Recycled Claim Standard (RCS)

The Recycled Claim Standard (RCS) is used as a chain of custody standard to track recycled raw materials through the supply chain.

The GRS/RCS logo ensures the materials used in the product are genuinely recycled.

## Forest Stewardship Council (FSC)

The Forest Stewardship Council (FSC) label is the world's most trusted mark for sustainable forestry.

FSC's pioneering certification system, which now covers more than 200 million hectares of forest, enables businesses and consumers to choose wood, paper and other forest products made with materials that support responsible forestry.
