

# Freya Bella

## Registered Rocky Mountain Filly

Born 3/25/2022. ADOPTION FEE: \$1500

Freya came to us in November 2023. The barn in which she was born was closing its doors, and the horses needed new homes. Freya's challenges left her not quite ready. We took her in to address these issues and prepare her for her future.

Freya was born with flexor tendon laxity. Treatment entailed lifts and extensive vet handling at an early age. Between this and her mother being aggressive towards her; she did not have a positive experience with additional people, nor the appropriate herd dynamics.

Freya began demonstrating aggressive behaviors herself. This was directed toward both people and other horses. Vet exams at her previous home ruled out ulcer related causes. It was around this time that she joined our farm.

She spent some time with our resident herd learning appropriate herd communication . We also furthered her training to provide patience and tolerance.

Freya has been taught a bridge signal which communicates "yes". This is a wonderful tool to use in all aspects of training. She learns extremely quickly and does NOT spook easily. She is drawn to interaction with people. This makes obstacles a wonderful potential future for her.

Comes to halter command, some liberty work, handles farrier, loads easily, beginning ground driving, great leading etiquette, and eager to learn. She does have some triggers for aggression lingering at the moment; so she will need a gentle, yet very confident and firm leader.

Her training is continually ongoing. For more information, or to schedule a visit email Wendy at [seazstable@gmail.com](mailto:seazstable@gmail.com)
