

Hi there,

We wanted to share an important update.

Stowe Legacy Construction is now operating as Glass Related Products.

The name is changing, but the people, ownership, commitment, and project standards remain the same. Ryan Stowe and the team will continue serving clients with the same focus on quality, communication, and dependable execution.

So why the change?

Over time, our work has become more specialized around commercial glazing, architectural glass, custom fabrication, and aluminum framing systems. The new name better reflects what we do today — and where we are continuing to grow.

For our clients and partners, this means a clearer focus and expanded capability across:

Commercial Glazing

- Curtain wall systems
- Storefront systems
- Interior and exterior glass installation
- Custom storefront pieces

Fabrication and Project Support

- Custom glass fabrication
- In-house aluminum frame fabrication
- Aluminum framing systems built with greater control over quality, fit, and lead times

Residential and Specialty Glass

- Euro shower doors
- Custom glass handrails
- Custom mirrors
- Vinyl windows for new developments

One of the biggest advantages moving forward is our in-house aluminum frame fabrication. This gives us more control over precision, customization, coordination, and quality — which helps us better support builders, developers, contractors, and property owners throughout the project.

If you are currently working with us, nothing changes on your end. Same team. Same commitment. Same focus on getting the details right.

If you have an upcoming glass, glazing, storefront, shower, mirror, handrail, or window project, we would be happy to help.

You can reach us at:

hello@glassrelatedproduct.com

Thank you for your continued trust and support. We're excited for this next chapter and look forward to continuing to serve you under the GRP (Glass Related Products) name.
