

Two Bills to prepare for a new Millennial way of life

22 April 2026 Earth Day

1.0 Simple Living Centers SLC

2.0 Habitat or Health HFH

working with Habitat for Humanity in

1.0 *Building Simple Living Centers - neighborhood facilities perhaps 50-100 families can walk to - supporting mothers with first born children, agency based education, home and local food production, sustainable energy producing - cooperative communities with tiny home affordable housing options. A local economic system that could work in place of the global system - were it to fail.*

(1.1) \$3 a month voluntary donation from each community member to access local HFH and SLC and international internet for Health **(1.2)** \$1/day for a new model of K-college education (or barter) to reskill our communities and teach leadership and emotional health classes based on the seven simple living centers of life within each of us. **(1.3)** a local micro-loan program to help the poor and homeless - **2.0** Habitat for Health Community centers - plan to replace closing small pharmacies with a new global - east/west vision for health. **2.1.** *With the 1.1 voluntary \$3/month per person town wide - 2 token donation (90% remains local 10% goes international HFH) referring to “token” because many members of churches may be guided to give much more. This donation will be used to develop local food security and a new international food system based on a cooperative townwide funding donations, and teaching correct principles of “health” in contrast to economic gain and deceptive marketing practices and reward games.* **2.2** \$1 per day or barter for 8 week educational courses based on the seven Simple Living Centers leadership/teaching model and educational courses needed for these sustainable, healthy communities. **2.3.** *A micro-loan program to help those in need with a goal to eliminate poverty, homelessness, support new mothers, and provide a new generation of affordable energy & food producing homes and neighborhoods.* **2.4 Start Up:** *Plans are to launch this to 20% of interested USA towns (Voting matters). By using film documentaries, and good research practices, we believe the results will speak for themselves and that this will tip the USA to a new way of life. (note: Communities not selected for start up - can start this movement in their own homes, and apply for start up funding as it becomes available)* **Vote to nominate your neighborhood or town & 3 visible international leaders are proposed.**

Elon Musk, Jon Huntsman Jr. and Michelle Obama.

A vital message to President Trump & all Americans, a new way to vote .. for a new way of life. A work foreseen & revealed for this time in history.

Two Bills

Background:

Over the last two decades I have been receiving key pieces of what is now “Two Bills.” - & a choice at this time (2026) for Americans. The history goes back many years. If you are inclined to discard this message, I understand, ...I discarded this message at first and forgot about it for over thirty years until 2010, when the two bills organizational names were given to me and this memory returned. I had been told early in my life - around 1978, by a message that came to me from a woman speaking one evening on the topic of the last days of our world system. In preparing her talk, she said she was given a message (*out of the blue*) about a man whose name was like the House of David, (*my name means small House of David in Italian*) and how at some time in the future he would begin a worldwide movement *when traveling from one state to another. She said this would be a movement that would bring people back to the simple ways of life in preparation for the new millennial Age or what some call a restoration of all things. (A return to Agricultural based communities & a simple - cooperative - higher way of life).*

This memory returned to me in 2010, while on vacation from my job running operations at the Utah State Capitol. At that time- when I was given the two names 1.0 Simple Living Centers and 2.0 Habitat for Health, I felt the presence of Joseph Smith Jr. a relative of my wife. More recently, in 2025 and 2026, two added witnesses came from Joseph appearing to me. One appearance in a Simple Living Center working with children, and another in a model of a cooperative community complex.

Just after receiving the two new names, I felt repeatedly directed to start a business plan. Months later in 2010, the 3 key financial pieces of a non profit business plan were been given to me (Bill items 1.1,1.2,& 1.3) Added pieces of the educational curriculum then unfolded. More recently, I have been shown in late 2025, and in 2026, that it is time to launch this beginning it as a **Two Bills** campaign.

Another key number I was given related to start up. I have been given a figure of \$14B for the start up and am asking for Elon Musk’s help in raising this to bring to the other key leaders that are needed to brand with Habitat for Humanity (branding value \$15B in 2025). I have felt impressed to nominate three visible figures. I ask you (*mothers and women in America and LDS women in particular*) to read through this and prayerfully vote and show your support for developing sustainable healthy communities with kitchen producing foods and tiny home farms.

This work has unfolded like pieces of a puzzle-mostly since 2010. I have not made this up. Why me?. My only thought is that change can come through ordinary people working together in their homes and communities. Why would this work even be needed? My wife has been shown a dream that economic collapse will come and a new agricultural economy will roll out with people wearing farm clothes, dancing and joyful. Both party leaders have said, that our way of life is not sustainable. **Two Bills can begin now in our homes.** - For when voting begins visit simplelivingcenter.com and please send this to others in your neighborhoods or faith groups.
