Customer ServiceHours of Operation Monday to Thursday: 9:00 am - 5:15 pm (ET)Friday: 9:00 am - 4:45 pm (ET)Mailing AddressBritax Child Safety, Inc4140 Pleasant RoadFort Mill, SC 29708USA The Britax Boulevard ClickTight combines superior safety with best-in-class convenience to make an excellent convertible car seat. With the ClickTight installation system, everybody can install this seat with absolute confidence. Britax's new convertible infant seat is designed with a dual control system for both parent and child. This infant seat incorporates a front-facing five-point harness and a side-impact crash sensor, protecting baby at the same time as ensuring maximum safety. A front-facing five point harness offers a comfortable and snug fit against the body, while providing the greatest protection possible. The front-facing five point harness helps prevent slippage that could occur when the seat belt is not used properly. Front-facing harnesses are designed for use with a weight range of twenty to forty pounds, and twenty to sixty pounds and over for a child over four years old. Britax Boulevard Clicktight installations allow up to a pound of weight to be securely attached to the frame. The Britax Boulevard ClickTight infant seat is a convertible seat that works as a back-only car seat with the addition of a forward-facing five-point harness. With the ClickTight installation, all you need to do is attach the weight belt to the frame and then install the weight belt on the child. A five-point harness will keep the baby completely protected in all directions. If you're not sure how to do this, call the company and they will gladly assist you. A tether is included with the product to help prevent the child from jumping out. If your child weighs more than forty pounds, you'll need to select the Britax Boulevard Convertible Car Seat Tether, which will work as a back seat with a three-point strap securing a weight limit of forty pounds. For a booster seat, the Britax Boulevard Convertible Seat and Booster will fit nicely into a seat that only requires a minimum weight capacity of ten or twelve pounds. The Convertible Seat also comes with the optional shoulder belt. Britax Boulevard Clicktight Versailles is another convertible child seat that allows for a lower weight rating than the average car seats. The front-facing harness will have a maximum weight of twenty pounds and no lower limit. Children up to forty pounds can enjoy this convenient seat, which also comes equipped with an added five-point harness height belt. An additional five-point harness is also available for use with the vehicle's reclining controls. The Britax Boulevard Clicktight Versailles is made with a front-hinged canopy that features two side pockets and an integrated tie-down strap. The adjustable canopy's side pockets can hold drinks, beverages and even your child's toys, which are kept securely in place thanks to the integrated tie-down straps. For convenience, there is a push button release latch on the side of this seat, which makes it easy to lower the canopy. There are also four recline positions, each of which has a forward and backward tilt. The Britax Boulevard Clicktight can also be used as a booster seat for a toddler who has a car seat that has a separate en-buckle harness instead of the harness straps on the seat. The Britax Boulevard Clicktight also features a separate handlebar that allows you to raise and lower the canopy. This handy release button allows you to lower the canopy and put the weight of your child safely back inside the car. The ez-buckle can be easily released when you want your child to sit behind you for a cup of coffee. For ease of use, the Britax Boulevard Clicktight is designed with a front grip and universal serial number tags. It comes with an instructional DVD and a carrying case. This seat may also be installed using the included quick-fit lumbar kit or by using the slip-on seat adapters. Installation is quick and easy; it requires only two people to complete the installation. Britax Boulevard Clicktight Convertible Car Seat - Your Infant's Travel Comfort Made Easy The Britax Boulevard Clicktight combines superior safety with first-rate convenience to produce an excellent convertible car seat. With the ClickTight installation system, all caregivers can install the Britax Boulevard ClickTight securely and easily with no tools or expertise required. A unique accessory for your infant seat, the Britax Boulevard ClickTight conforms to tight contours of the c-shaped curve in the back of the car seat so you can be sure that it will not move or wiggle while your baby is inside it. With the ClickTight installation system, you can install with complete confidence.

With the Britax Boulevard ClickTight seat, you get a three-point harness system that features a five-point strap or dual point belt system. You will find this product very easy to use with its click-in attachment on the seat's belt.

This is where the baby will fasten itself with its body against the car seats' belt. The Britax Boulevard ClickTight uses a five point or dual buckle strap system depending on the model. There are also models with the double-waffle attachment that allows parents to fasten two children together. The Britax Boulevard ClickTight also comes with a shoulder height limit, which makes it a safe, sturdy, low-profile, high-performance seat that adjusts to child size quickly and easily. This seat will fit most car seats regardless of their offset position. It also comes equipped with a locking foot base with the option for a locking handheld base. The attachment is designed to attach to the front bumper through a durable buckle.

If you prefer not to fasten through the front bumper, there is a release buckle located on the side of the seat, allowing you to unhook the infant from the harness without taking it off.

One of the best features of the Britax Boulevard Click Tight is the built-in Anti-Rebound Bar. This bar prevents the child from being lifted too far by the strap. As the child grows, the Anti rebound Bar will adjust to his or her new size. This feature makes the attachments more secure and comfortable to use. The front face pocket on the ClickTight ensures easy access when changing a baby's diaper. The built-in front pocket also provides easy storage for other items you may need. There are one infant seat pocket and one side impact protection pocket on this seat. The side impact protection pocket will fit into most vehicle pockets; the front infant seat pocket is larger and is designed with one-piece closure. The front seat pocket can be used to store other personal belongings, including cell phones, sunglasses, medicines, toiletries, and make-up items. The infant car seats by Britax are one of the most well rounded infant car seats on the market today. They have been designed to conform to the federal regulations for safety in the interior of an automobile. They meet the required standards for federal regulation and are highly durable. These infant car seats also feature a lifetime warranty.

The Britax Boulevard Clicktight Convertible Seat conforms to U.S. regulations for safety in cars, boats, and even RVs. Britax offers three styles of their convertible car seats: the Side-by-side, the Coupe, and the Convertible. The Side-by-side features a v-shaped harness and a two-point harness strap with dual control. The Side-by-side also has a belt-low adjustable recline and a front bumper shield. The Convertible has a single point harness, a belt-low adjustable seat, and dual control.

This is a great infant car seat for infants who weigh thirty pounds or less and can be safely transported in a rear-facing position with a manual seatbelt. When side-by-side, the child can be safely transported forward in a forward-facing position using the same harness. A Britax Boulevard Clicktight Convertible Seat makes it safe for infants to be placed safely in a rear-facing position.
