

INFECTION CONTROL

Users of Mucky Kidz can be confident that the club has safeguards in place against the spread of infection.

This will be achieved by the following:

- Practising good infection control within our settings.
- Encouraging hand washing by both the children and staff especially prior to commencement of daily activities and after toileting, coughing, sneezing and blowing their nose.
- Tissue station are situated in each room, with tissues, bin and hand sanitiser.
- Ensuring that the play environment is kept clean, disinfected and well maintained.
- Any staff suffering from infectious diseases shall notify the manager prior to attending work.
- Ensuring that parents/carers are aware of their responsibility to inform staff of any infectious disease or condition that their child may have.
- Staff shall be encouraged to attend food handling courses.
- We shall follow the government guidelines from the NHS Guide to Infection Control.
