Our fundamental investment objective is to achieve absolute long-term capital appreciation while minimizing the risk of capital impairment. We invest in global companies with a **margin of safety**, which is the difference between the intrinsic value of a company and the price paid. We aim to uncover and invest in companies that have long-term growth potential, strong business fundamentals, and are typically owner operated at a discount to their intrinsic value. We conduct our research and **invest like business owners** and place great emphasis on the alignment of interest between management and shareholders.

We believe that a permanent loss of capital is the primary source of risk and not market volatility. At Tempered, **market volatility is embraced** and not shied away from. Short-term mark-to-market decline in security prices provides us with investment opportunities. To capitalize on these opportunities, it is essential for our clients to share our multi-year investment horizon as these volatile situations may occur regularly and can last for an extended period of time.

Furthermore, we believe in managing a **concentrated portfolio** of companies to enable us to focus on the most compelling investment opportunities. By managing a concentrated portfolio, the risk of capital loss can be reduced when investing in companies that trade at a discount to their intrinsic value. In the long run, we expect our investments to reflect their estimates of intrinsic value.

We are a Vancouver, BC based investment firm founded in 2010. We manage assets on behalf of a select group of institutional, high net worth individuals and retail investors in both Canada and the United States through separately managed accounts and a proprietary Canadian pooled fund. We are registered with Canadian securities regulatory authorities and the U.S. Securities and Exchange Commission.

*All data is reported in CAD unless otherwise noted. Figures are audited to December 31, 2021.*

*\*The Fund will distribute at the end of each taxation year such portion of its annual net income and net realized capital gains as will result in the Fund paying no ordinary income tax under Part I of the Tax Act. Generally, it is expected that the distribution will be calculated and payable to each Unitholder of record as of the close of business on the last business day in each taxation year. All such distributions made by the Fund will be automatically reinvested in additional Units of the Fund. Unitholders will be required to include all such distributions in computing their income for tax purposes, whether or not that cash has been distributed to such Unitholders.*

*Performance figures are presented net of fees based on Tempered Global Value Fund Series M historical returns. Investment management fees, performance fees, custodian fees, administrative fees, and trading expenses all may be associated with fund investments. The current fee structure was implemented on July 1, 2019. Prior to that, there was no performance fee component. The indicated rates of return are the historical annual compounded total returns including changes in net asset value and reinvestment of all distributions, but do not take into account sales, redemption, distribution or optional charges or income taxes payable by any investor that would have reduced returns. Investment funds values change frequently. Past performance is no guarantee of future results.*

*This material is intended for information purposes only. It does not constitute an offer to buy or sell our products or services nor is intended as investment advice on any subject matter. Units of the Fund are offered without a prospectus. As such, the Fund is only available to qualified investors that meet the conditions of various exemptions as outlined in National Instrument 45-106 Prospectus Exemptions. Please read all disclosure documents thoroughly before investing. Securities issued under prospectus exemptions are subject to resale restrictions.*
