Date: February 13, 2018

To Whom It May Concern:

NBT Construction & Supply, LLC, was retained to replace a boiler at the Redwood Laboratory, Pacific Southwest Research Station. NBT Construction was the prime contractor for this project and they were responsible for the hiring of subcontractors.

This was my first time working with Andy Clementz and NBT Construction. I offer my highest recommendation. The company was professional, responsive, and performed the work within specifications, time, and budget. This made my job as a Contract Specialist easy, considering I was dealing with a voluminous workload along with providing support for wildland fires. I would not hesitate to hire this company in the future.

If you would like to further discuss my experience with the company, feel free to contact me at 406-624-3442.

Sincerely,

A handwritten signature in blue ink that reads "Dana M. Bangart". The signature is fluid and cursive, with a long horizontal flourish extending to the left.
