

Division of Marine Fisheries

Fish Finder

North Carolina Division of Marine Fisheries' Guide to what's catching.

The Fish Finder? How does it work? We've divided the fish which are commonly found in Coastal North Carolina into several categories. These relate to either the type of fish (tunas, billfish, etc) or the locations where they are most commonly caught. Of course, sometimes some of the fish in the Offshore/Reef group might swim closer to shore and be found where you would expect Inshore/Coastal fish. Likewise some of the Inshore/Coastal fish are as much at home offshore as inshore. We have also listed all the fish by name only, in case you have no idea where they are commonly caught.

All fish illustrations by Duane Raver, Jr. from the book **Fisherman's Guide** Fishes of the Southeastern United States by Chuck Manooch and Duane Raver
