

Termite Bait Station Renewal Preparations & Upkeep

Please ensure the following conditions are maintained to assist with Meriwether Pest & Wildlife in finding your termite bait stations for renewal.

- Do not remove the flags/markers placed at the stations.
- Do not install mulch, rocks, and/or other landscaping material or construction over the stations that will prevent us from finding the stations. If you plan to do landscaping, please contact us in advance to move the stations to another location.
- Please cut the grass and weed-eat all areas around the stations prior to your renewal appointment.
 - We will try all means to locate the stations for renewal; if stations need to be replaced there will be a replacement fee as noted on your service agreement.

We have metal installed inside the termite station lids, flags for stations in the mulch beds, as well as a diagram noting all station locations to best help us locate the stations.
