

Dear [MP's name],

I am writing as a constituent to ask you to support the #Unheard campaign, calling for improved diagnosis, specialist care and long-term support for people living with endometriosis.

The average time to diagnosis is nearly nine years, during which many face severe pain, mental health challenges, disrupted education and loss of employment. Access to specialist services varies widely by region, creating unacceptable inequalities.

The campaign asks Government to prioritise endometriosis through faster diagnosis, equitable access to care and improved professional education.

If you are willing to support #Unheard, organisers Endometriosis Awareness North would publicise your commitment. The drive is currently being promoted via their @endoawarenessnorth and @dranitasharma Instagram, Facebook, X and Bluesky social media channels.

Please email petergibsonendoawarenessnorth@gmail.com

If you are willing to discuss the matter in more depth, please email me on my address,

With best wishes,

(Your name and postcode).
