

## Virginia "Ginny" Jablonski

Get Help

**Sunday, October 14, 2018 from 11:00 am - 12:00 pm**

**CalChiro is excited to announce one of our 2018 Convention Keynote Speakers: Virginia "Ginny" Jablonski.**

Ginny is active in lobbying at the state and federal level regarding the opioid crisis in an effort to legitimize the field of chiropractic as an alternative to opioids.

After years of suffering from an undiagnosed illness, which traditional medical treatments had been ineffective in treating, Ginny Jablonski began researching a variety of alternative healing modalities and traveled extensively to receive healing from many "masters." Much to her surprise, Ginny realized that she possessed similar intuitive healing abilities, which she applied to her life's passion of rescuing and rehabbing race horses.

During her illness, Ginny suffered from the toxic effects of various prescription medications, which ultimately, caused her heart to stop beating. Ginny will share her journey to getting off of prescription medications, regaining her health, and how her animals led her down the path to healing through their telepathic communication.

Don't miss the opportunity to hear Ginny's motivational story at our 2018 Annual Convention!
