PRESS RELEASE
January 28, 2019

FOR IMMEDIATE RELEASE

Scott Hanratty Joins TurboTides Sales Team

Lebanon, NH, USA. January 28, 2019. We at TurboTides Inc. are pleased and proud to announce that we have welcomed Scott Hanratty as our newest team member. Mr. Hanratty joins our sales and marketing team as Sales Director – Americas. Mr. Hanratty is now responsible for sales and marketing in the Americas region, to include North, Central, and South America.

A graduate of Pepperdine University, Mr. Hanratty brings to TurboTides over 30 years' experience in direct and channel sales management. Having worked until recently at Concepts NREC, a turbomachinery engineering company in Wilder, VT, Mr. Hanratty has enjoyed a long career in sales of advanced engineering software at some of the industry's most well-known companies, including ANSYS, Inc., MSC Software Corporation, and Autodesk, Inc.

"In addition to having shown a remarkable and consistent track record of sales success, Scott is one of the most well-connected people in the turbomachinery industry," remarked Scott Thibault, Vice President of Sales and Marketing at TurboTides Inc., "we are thrilled to have him on board to lend his experience to our team and to represent our company and our technology."

"I am excited to be here," said Hanratty. "When I learned of the genuinely new and innovative nature of TurboTides, I wanted to be a part of bringing this new generation of turbomachinery software to the industry. I am very impressed with the TurboTides technology because it so comparatively easy to learn and use. As a result, TurboTides should not only be of interest to companies using older commercial turbomachinery design software but also to those who have for years shied away from commercial tools as too complicated to use and too difficult to learn. I am proud to be presenting it to the greater turbomachinery design community."

About TurboTides Inc. Founded in 2015 by Dr. Xuwen Qiu, TurboTides Inc. is a New Hampshire corporation located in Lebanon, NH, USA. TurboTides Inc. develops, markets, sells, and supports the TurboTides integrated turbomachinery design system, a new generation of advanced commercial software for turbomachinery design.
