The brand new Cloud ATLAS VF9100 is a single channel, forward-facing window-mounted camera that captures the unexpected.

The ATLAS comes in a discreet, sleek design with an array of special features to keep you safe on the road. With full HD 1080p resolution, recording at 30 frames per second, you can feel safe in the knowledge the ATLAS will capture every event.

Additionally, the ATLAS VF9100 also has the latest GPS technology to pinpoint the vehicle's location, and 6-axis g-sensor to detect any sudden change in direction and aid in the investigatory process.

Self Install Option

Self fitted and comes with 12v power adapter that connects to your in car power point (cigarette lighter) and 128 gb memory card

£119 inc VAT

Hard Wire Install Option

Hard wire install with camera supplied and installed by one of our class leading installation experts. Comes with 128 gb memory card.
