

Vehicle Defect Checks App

Maintain Control of Fleets Condition

Remove the need for paper on your daily walk around check! Our easy to use web-based application allows you to maintain full control of your fleets condition, checks and inspections all synced in real-time.

Real Time Reporting

Know exactly what is happening with your assets with real time reporting.

DVSA Compliant

Create a customised checklist to cover all aspects of your vehicles or use the DVSA approved default checklist already loaded into the app.

Log Inspections

Easy to use interface allowing you to easily log inspections.

Update Vehicle Records

Easily update your vehicles records by having them all collated into 1 place allowing you to maintain control of your fleets condition.

Call on: 01773 768 888

The Cloud Telematics Vehicle Defect Check app was designed to make collecting reports on vehicle defects quick and easy by being able to conduct checks and collate all of your fleets defects on a per vehicle basis into one place.

Make your daily walkaround check with no paper with real time reporting and tracking implementation.

Multiple User profiles

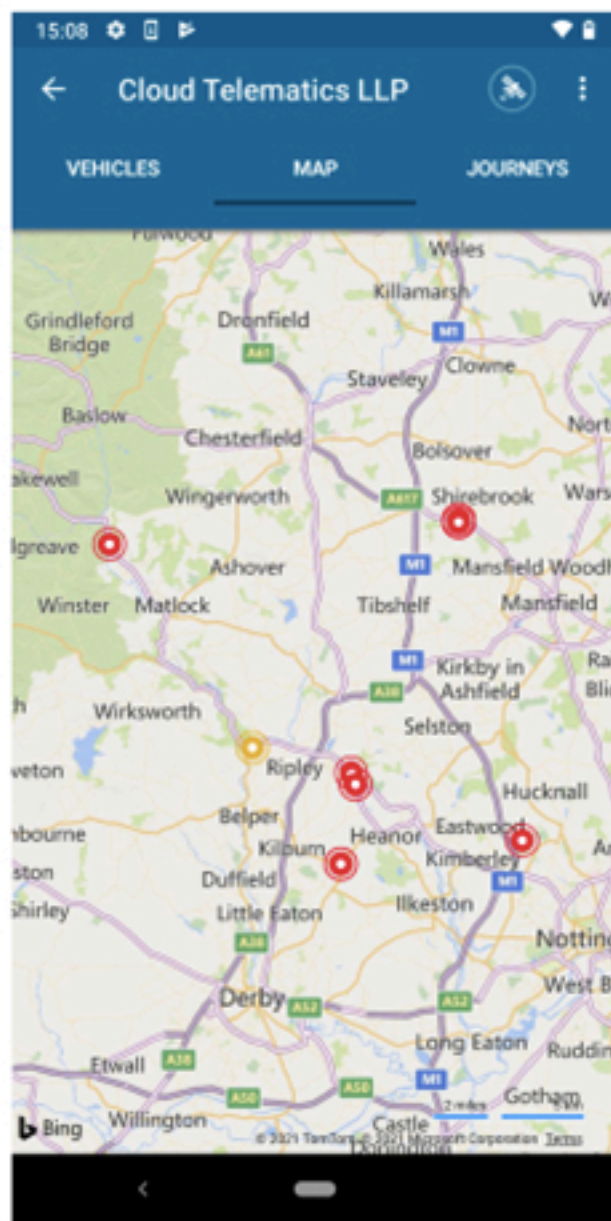

Make your team fully synchronised by adding multiple users

Paperless History

Have instant access to your historical data from anywhere by any member of your team making working remotely easier.

Tracking Implementation

As well as keeping a log of your fleets defects, you can also track the movement of your vehicles giving you maximum control of every aspect of your business.
