Making Line Graphs

Exploring shipwrecks is a favorite adventure for many scuba divers. Some of them will go to great depths to snoop around in ghostly, sunken ships.

The Data Table shows the depths of 12 different dives. Show the depths by completing the line graph. Finish labeling the intervals for feet measurements. Plot each data item. Then, draw the line to show the depths of the dives over a 12-day period.

Depths of Dives

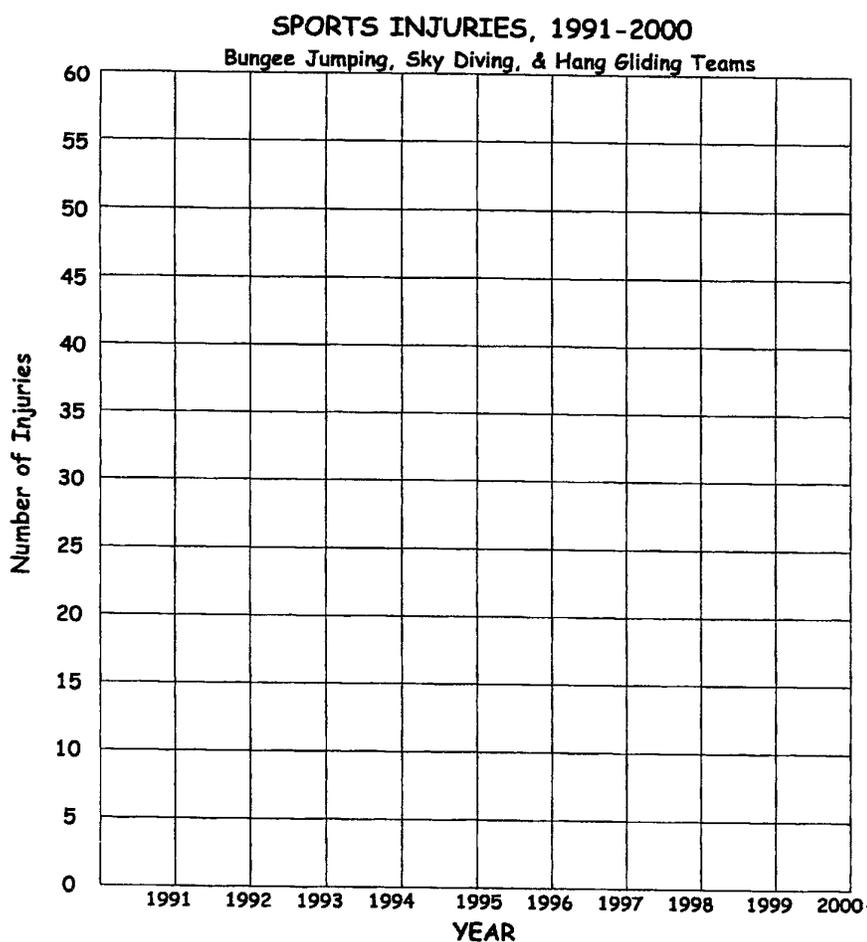

Dive Data

| Dive # | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
|---------------|----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| Depth in feet | 90 | 225 | 350 | 610 | 190 | 250 | 500 | 490 | 410 | 222 | 150 | 400 |

Making a Triple Line Graph

Along with the thrill of most extreme sports comes a high risk factor. In all the sports, athletes use good equipment and follow rules to keep safe, but accidents are always a possibility. And when the sport takes place high up in the air above the ground, the accidents or injuries can be even more scary!

Three teams of friends from different sports kept track of the injuries each year over a 10-year period. The table shows the results of their count. Use this data to finish the line graph. Plot the amounts for each team for each year. Use the correct color of dots for each sport. Connect the dots with the line of the same color.

| | |
|----------------|-------------------|
| Sky Diving | BLUE Dots & Line |
| Bungee Jumping | RED Dots & Line |
| Hang Gliding | GREEN Dots & Line |

| Sport | Color for line | 1991 | 1992 | 1993 | 1994 | 1995 | 1996 | 1997 | 1998 | 1999 | 2000 |
|----------------|----------------|------|------|------|------|------|------|------|------|------|------|
| Sky Diving | blue | 33 | 44 | 44 | 56 | 47 | 54 | 58 | 28 | 25 | 20 |
| Bungee Jumping | red | 8 | 4 | 18 | 12 | 30 | 38 | 45 | 50 | 43 | 37 |
| Hang Gliding | green | 20 | 26 | 19 | 38 | 55 | 59 | 60 | 56 | 60 | 60 |
