

Name \_\_\_\_\_ period \_\_\_\_\_

## 6<sup>th</sup> Grade Do Now

**SCI.6.10D** Describe how plate tectonics causes major geological events, such as ocean basins, earthquakes, volcanic eruptions, and mountain building

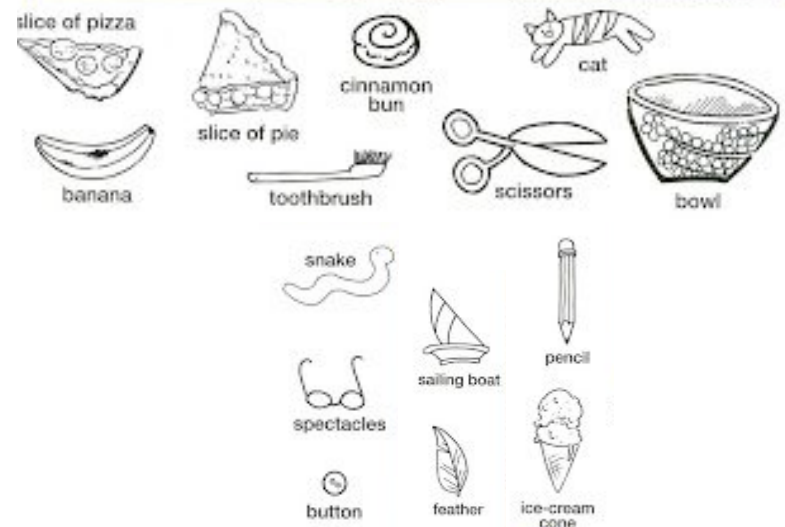

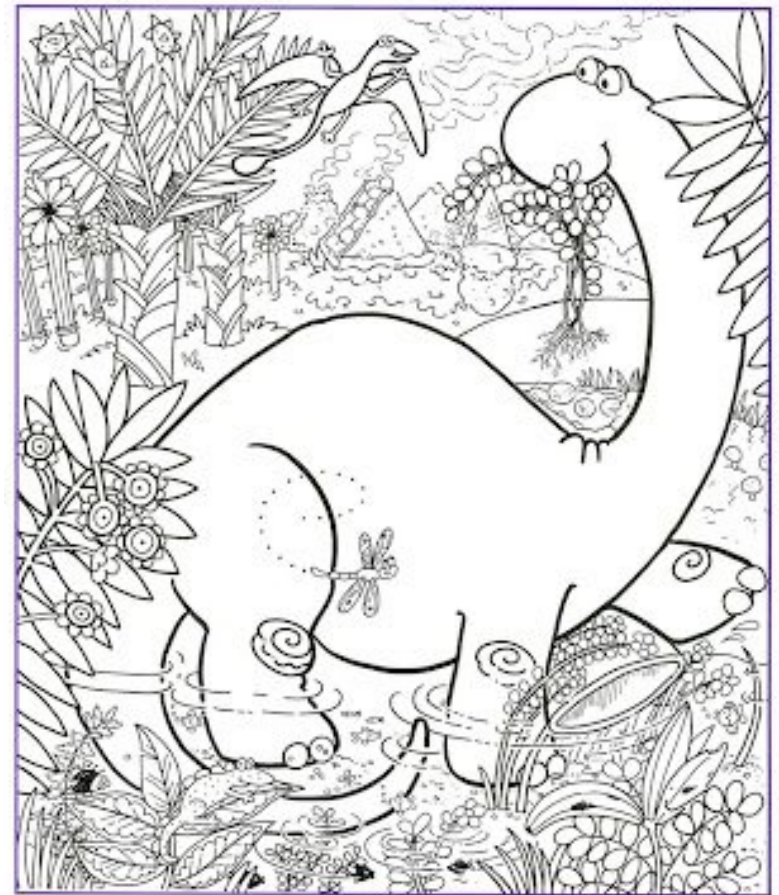

Monday Date \_\_\_\_\_

What evidence do scientists have that supports the Theory of Plate Tectonics?

Tuesday Date \_\_\_\_\_

What causes the continents to move?

- A. The ocean waves
- B. The pull of the moon
- C. Convection Currents
- D. They don't move

Wednesday Date \_\_\_\_\_

What type of plate boundary causes ocean basins?

- A. Divergent boundary
- B. Convergent boundary
- C. Transform boundary
- D. Preform Boundary

Thursday Date \_\_\_\_\_

What type of plate boundary causes volcanoes?

- A. Divergent boundary
- B. Convergent boundary
- C. Transform boundary
- D. Preform Boundary

Friday Date \_\_\_\_\_

What type of plate boundary happens when two plates slide side by side?

- A. Divergent boundary
- B. Convergent boundary
- C. Transform boundary
- D. Preform Boundary
