

Engage

Who Eats Who?

What To Do:

1. Observe the image below.
2. First write down everything you know and can remember about the image
3. Put an E for energy above each arrow.
4. Talk to you neighbors and see what they wrote down.
5. Write down anything new you learned from them.

Explore

Materials: Animal Playing Cards – enough so each student has one, music from Lion King movie found at https://www.youtube.com/watch?v=nbY_aP-alkw

What To Do:

1. Your teacher will give you a playing card with an animal and what it eats on it.
2. When the music starts and your teacher says “Hakuna Matata”, get up from your seat and wander around the room until you find someone who has a card of an animal your animal likes to eat or an animal that likes to eat your animal.
3. The person with the animal that is eaten should sit down and the person with the animal that has had a meal should take the card and continue looking for more food.
4. When no one can find anything more to eat, the students still standing should read what animal they are and what they ate.
5. Make a list of what you heard in the space below.

Animal	What it Eats
Lion	
Cheetah	
Hyena	
Crocodile	
Leopard	
Rhinoceros	
Hippopotamus	
Elephant	
Giraffe	

Questions:

1. Which animals were left standing?
2. Why do you think the lion and cheetah were left standing?
3. Why do you think the hippopotamus and elephant were left standing?
4. Which animals were eaten?
5. What do most of the animals that were eaten eat?
6. Why did you put an E over the arrows in the first activity?

Explain

What To Do:

1. Watch the video found at <https://www.youtube.com/watch?v=56IIIzQQfa8>
2. Cut out the statements at the bottom of the page and glue them into the correct column below.

PREDATORS 	PREY 

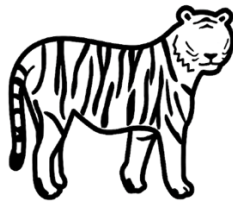

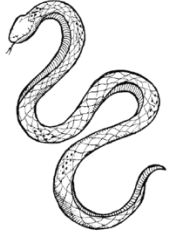

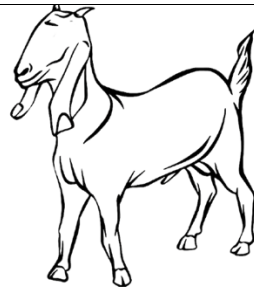

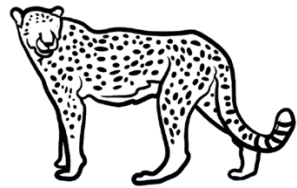

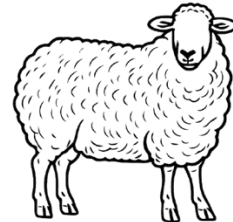

Animals that predators eat.	Their eyes are on the side of their head.
Eyes are on the front of their head.	Animals that hunt for other animals.
Their eyes help them to see danger coming from the sides.	Like cheetah, lion, and wolf.
Their eyes help them to see how far something is.	Like rabbit, , deer. and zebra.

Elaborate

What to do:

1. Draw in the eyes for each animal.
2. Write whether the animal is a predator or prey in the box.

Questions:

1. Why do predators need to have eyes in the front of their head?
2. Why do prey need to have eyes on the side of their head?

Evaluate

Name _____ period _____

EXIT TICKET

Who Eats Who?

1. Animals that hunt other animals are called –
 - a. predators
