CAPABILITY STATEMENT

SineWave Analytics Group is an innovative company in the **digital transformation** for the Internet Of Things (IOT), and intelligent electrical devices (IED's). Our commitment is to **transform siloed data into mission critical information,** in order to improve efficiency, troubleshooting, reliability, and mitigate maintenance and operating costs.

NAICS	PSC
541330	R425
541519	R408
541512	R410
541511	R425
545611	DA01
541618

Core Data Engineering Competencies:
- Data mining and extraction.
- Comprehensive data engineering assessments, complex data analysis, and data visualization reporting/schemes.
- Data transformation.
- Complex data analysis and engineering
- Power BI reporting and visualizations
- Predictive, corrective, and preventative maintenance and engineering programs.

What sets SineWave Analytics Group apart from others?
- Offer low-cost digital transformation solutions for government facility entities and commercial enterprises.
- Strategic utilization of clients existing software and network infrastructure to achieve cost saving initiatives.

Core Smart City Engineering Competencies:
- Digital parking management and enforcement.
- Reduce emissions and congestion by utilizing cellular technology for street parking.
- Integrate smart lighting, waste management, traffic systems, and smart buildings to promote and preserve environmental initiatives.

Industry Standards SME
- NFPA/NFPA 70E
- IEEE
- NETA
- ASTM
- OSHA

Past Performance:
- Steel Industry – Power Systems Engineer for 169KV power distribution down to 480V.
- Oil and Gas Industry – Maintenance Manager, Superintendent, for 138KV power system.
- SME in Transformers, switchgear, breakers, MCC's, VFD's, UPS Systems.
- SME as a Data Engineering Analyst for Complex data analysis and engineering.
- SME in Predictive, corrective, and preventative maintenance and engineering programs.
- Unites States Navy – Aviation Machinist Mate (Jet Engine Technician).
