Acoustic Solution

PLAIN ACOUSTIC

PANEL: The plain acoustic panel is a new kind of sound absorption material made of 100% polyester fiber through high-technology heat and fusion in the form of coccan cotton with different degree of air permeability and density. A palette more of 15 colors are available.

SIZE: Standard: 3mm x 1050 x 1000

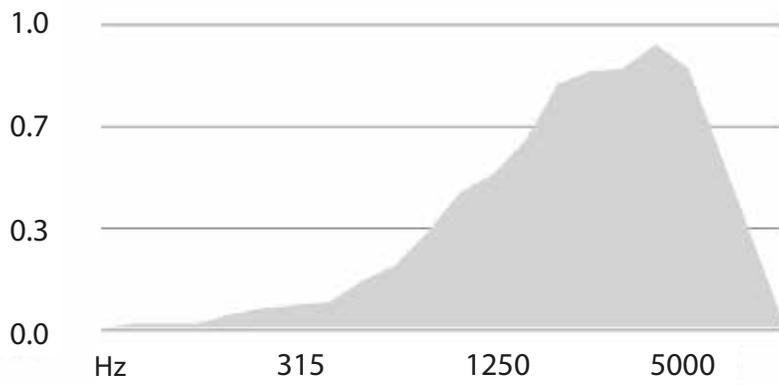

Composition PET (MIN 50% recycled)

Roll Dimensions 1050mm x 14300mm

Weight 475 gr/m2 ≥95%

Thickness 24mm +/- 0.3mm

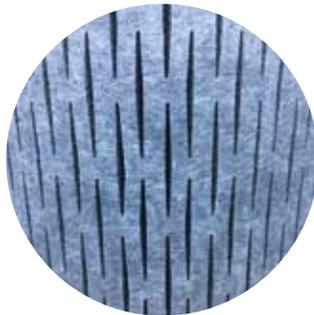

3 mm NRC Test Acoustic Performance

SGS fire test in accordance with EN 13501-1:2018 (B)
 SGS test report no. GZIN2005020858CM, May 28, 2020
 SGS fire test according to ASTM E84-13A class A
 SGS test report SDHG1309008105F
