Sustainability Reporting

Sustainability reporting in alignment with the CSRD

Sustainability reporting inspired by the CSRD

Sustainability reporting in alignment with the VSME

Benchmark Services

**Trend
assessment**

**Best
practices**

**Gap
analysis**

 **SMALL PACKAGE**

FREE

Benchmark includes:

- Trends
- Statistics
- Examples

 **MEDIUM PACKAGE**

Benchmark includes:

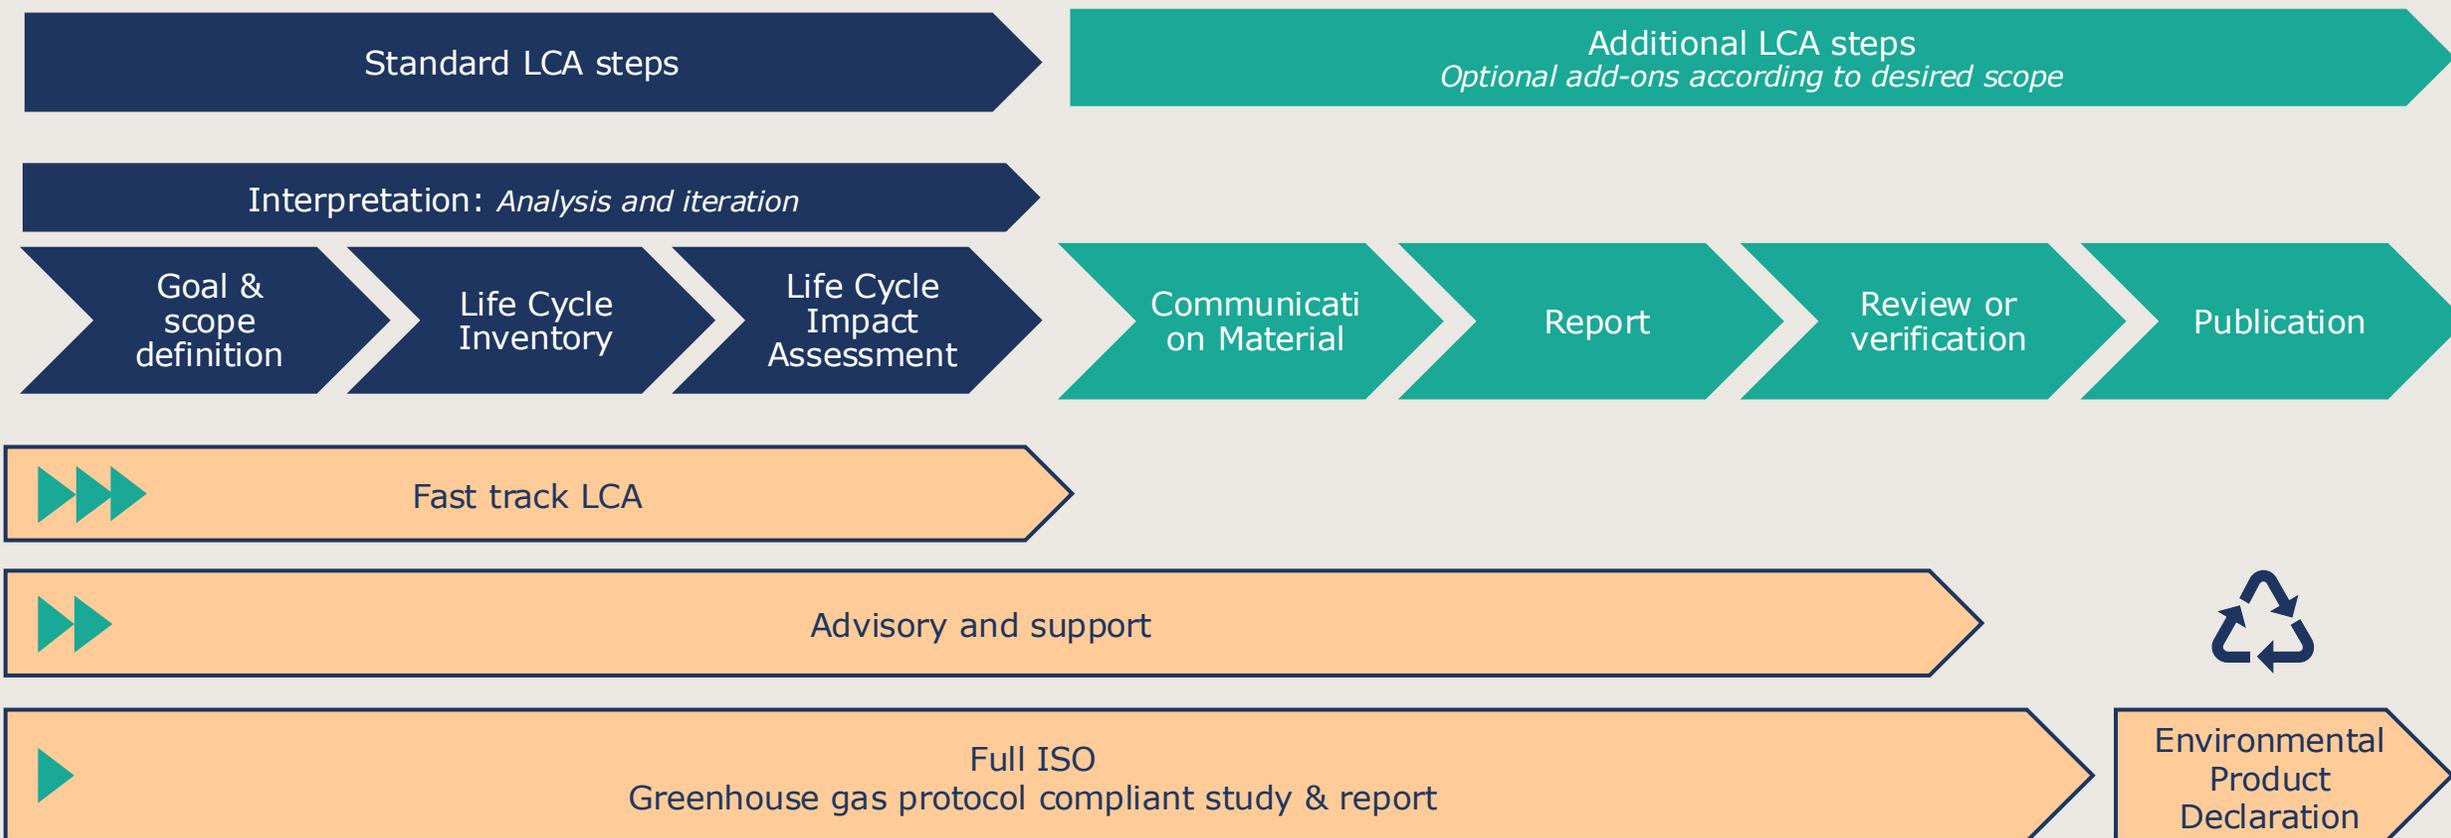

- Trends
- Statistics
- Examples
- Industry specific data
- Gap analysis of your performance
 - Comparison to the report

 **LARGE PACKAGE**

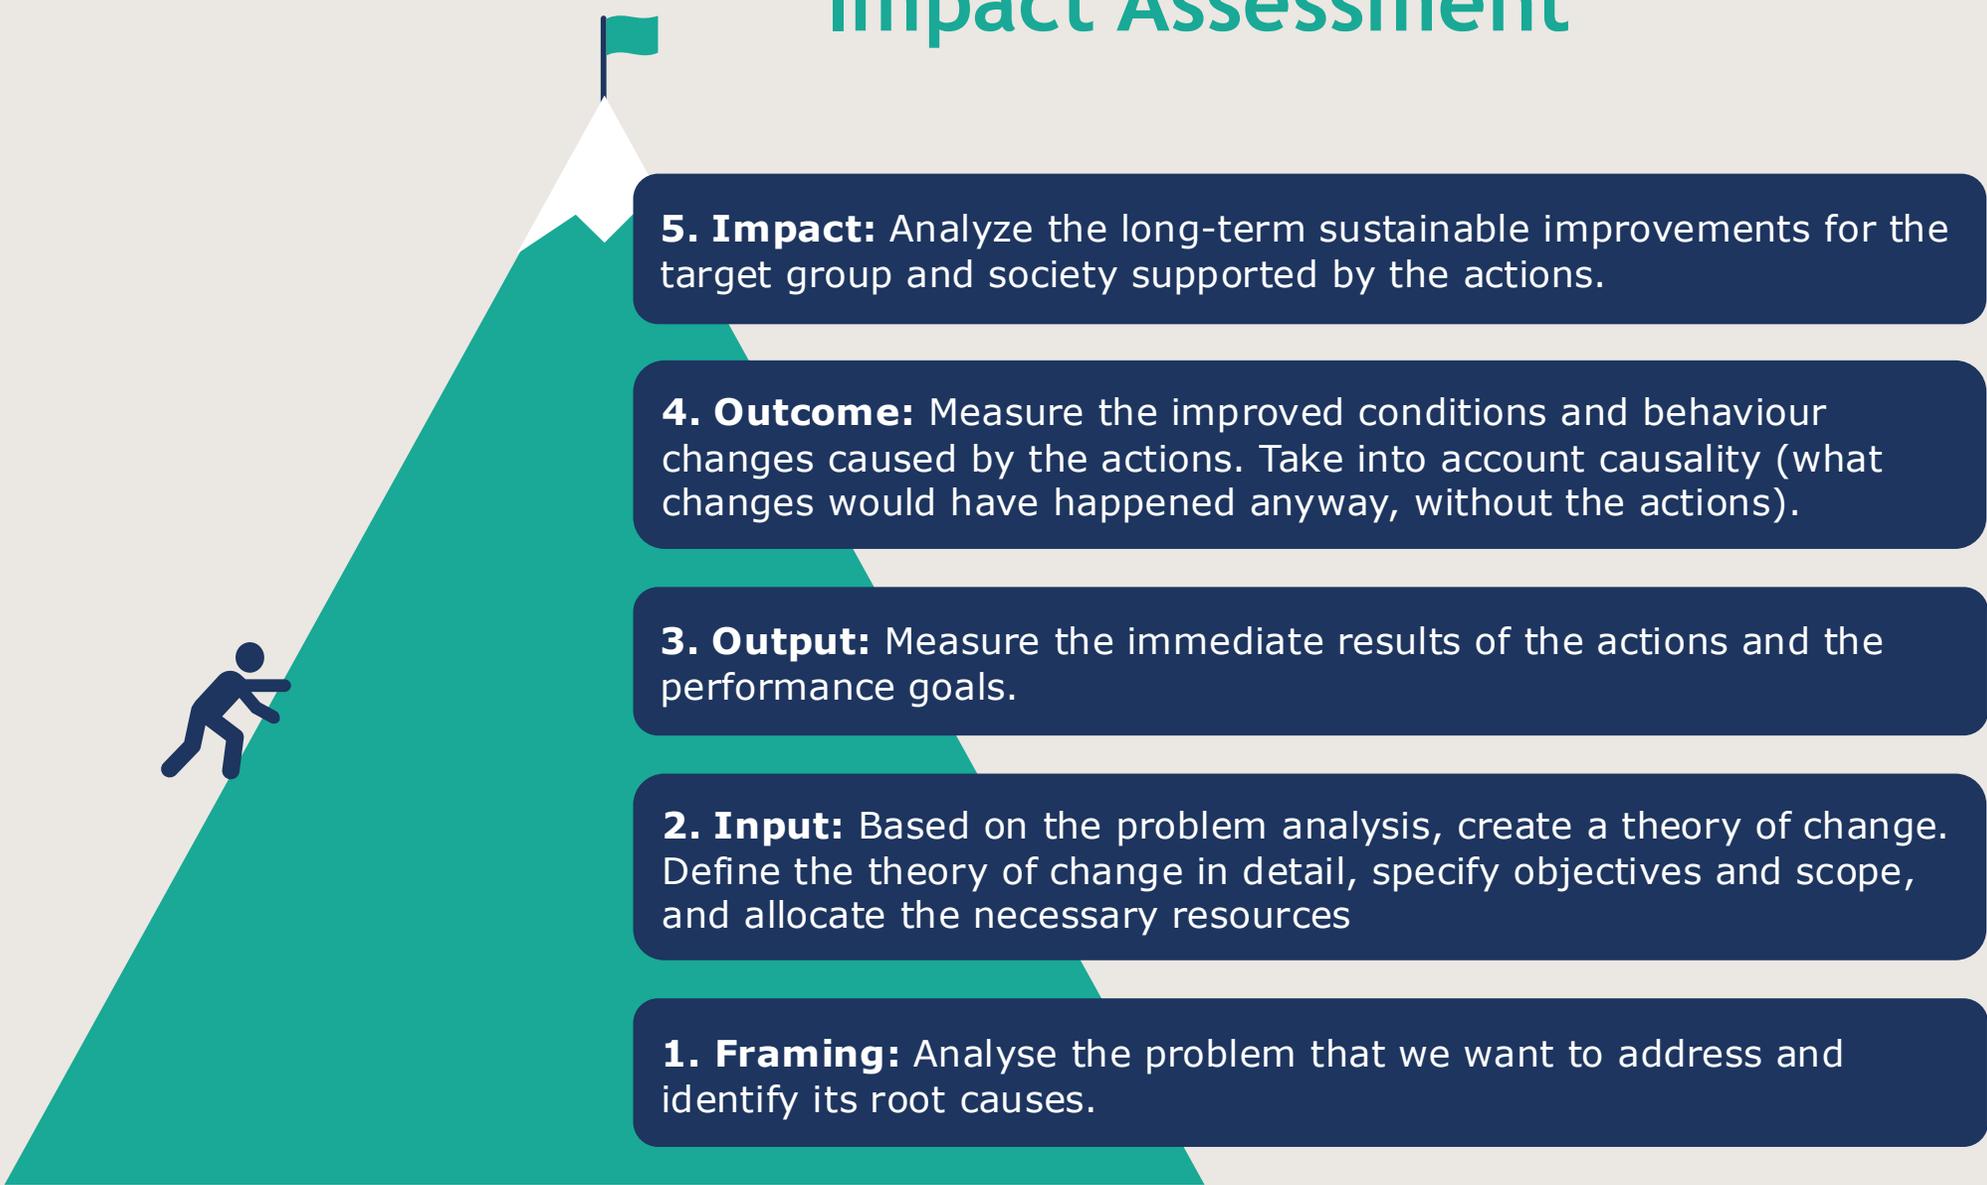

Benchmark includes:

- Trends
- Statistics
- Examples
- Industry specific data
- Gap analysis of your performance
 - Choose your own peers (5–10)
 - Comparison to the report and indicators of choice (5–10)
- Recommendations for improvements

Life Cycle Assessment (LCA)

Impact Assessment

5. Impact: Analyze the long-term sustainable improvements for the target group and society supported by the actions.

4. Outcome: Measure the improved conditions and behaviour changes caused by the actions. Take into account causality (what changes would have happened anyway, without the actions).

3. Output: Measure the immediate results of the actions and the performance goals.

2. Input: Based on the problem analysis, create a theory of change. Define the theory of change in detail, specify objectives and scope, and allocate the necessary resources

1. Framing: Analyse the problem that we want to address and identify its root causes.

Education

Forever offers a wide range of educational courses, both independently and in partnership with **NyTeknik Education**, covering current sustainability topics or tailored to your needs.

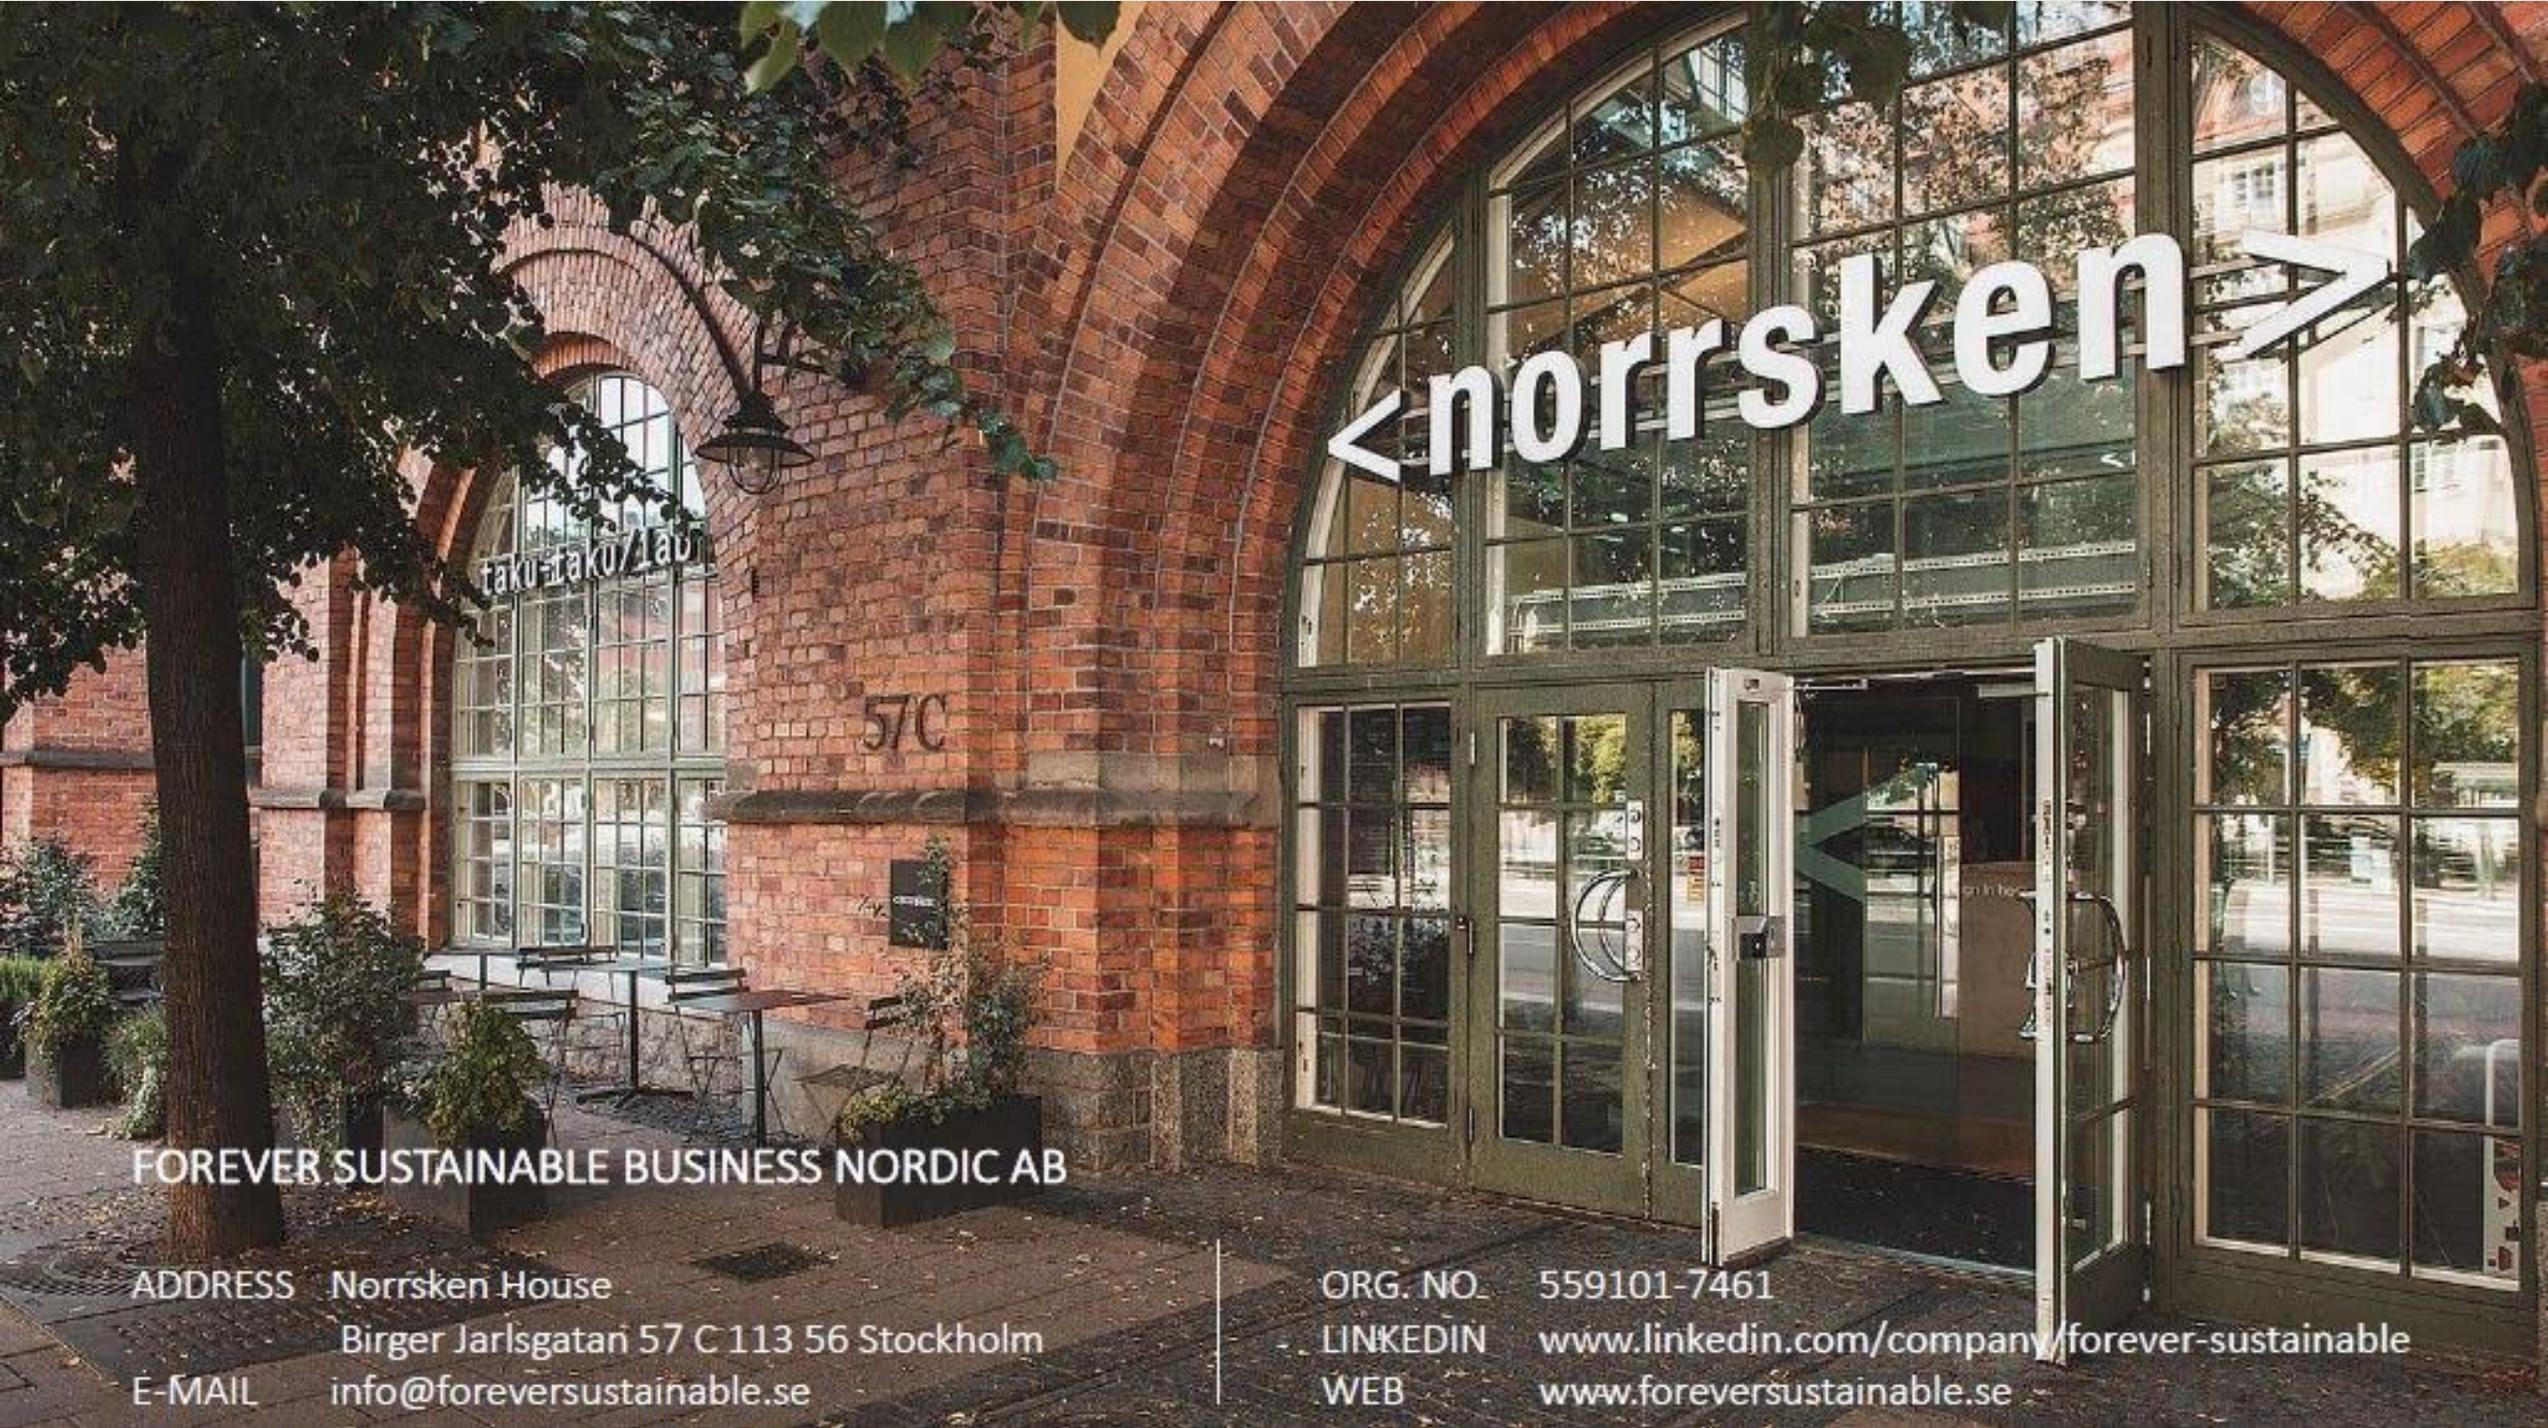

1. Identify needs

2. Create course

3. Host training

Select from a wide range of courses on **NyTeknik Education** hosted by Forever
