

Product Overview

***FOCUS*treat MC-9210**

Metal Precipitant

Product Description

FOCUS^{treat} MC-9210 is a sodium dimethyl dithiocarbamate based waste treatment additive for precipitating metal ions. MC-9210 provides a safe, cost effective means for removing heavy metals from chelated and non-chelated waste streams. MC-9210 can be used in batch or continuous treatment processes and will reduce most heavy metal concentrations to below 0.10 ppm. MC-9210 forms a chemically stable sludge that settles rapidly and dewateres easily.

Physical Properties

Specific gravity:	1.17
pH:	11-13
Appearance:	clear, yellow-green to amber liquid
Flash point:	> 200 °F

Storage

Store in original containers above 40 °F away from alkaline materials.

Safety

Avoid contact with eyes, skin and clothing. Wear chemical handler's gloves, goggles and protective clothing when handling. Read and understand Material Safety Data Sheet before using this product.
