

1989-93 170 E. MAIN ST, ROCKAWAY

This 7,500 Sf office building was erected in the early 1990's. The site was originally developed in 1904 as a service and repair center for a local trolley service, which operated until 1928. The repair shop was built on a field stone foundation parallel to and 5' inside the Beach Street ROW. The zoning in the late 1980's dictated that maximum use of the site required tearing down the existing structure and rebuilding on the existing foundation, once it was reinforced and made structurally sound.
