AQUAPHOR innovative technologies

- ✓ All key technologies are the intellectual property of AQUAPHOR.
- ✓ The company has 130 patents globally over the history of its existence and keeps adding more.
- ✓ Our own research facilities are the driving force, which shapes the distinctive qualities of the AQUAPHOR filters compared to other brands: they purify longer and they filter more contaminants at greater efficiency.
- ✓ AQUAPHOR filters utilize a maximum of the sorbent potential, remove a wide range of hazardous water impurities, are aesthetically attractive and easy to maintain.

AQUALEN™ Unique ion-exchange fiber. Fully eliminates heavy metals and permanently absorbs harmful impurities.

Hollow Fiber membranes are tiny tubes with porous walls and huge filtering surface. A pore diameter of 0.1 micrometers ensures reliable cut-off for microorganisms. The hollow fiber is a universal shield. It provides a 99.99% guarantee of cutting off germs and bacteria, Giardia cysts and other intestinal parasites, removing the undissolved impurities and sediments.

Carbon Fiber Block™ (CFB) is a technology of manufacturing filtering media of different degree of porosity for any level of water contamination.

SILVER IN AQUALEN™ FIBER Method of dynamic silver capturing. It allows to utilize active silver as a bactericide

The uncompromising efficiency of the water-on-water storage tank is provided by its unique design. Unlike the classic RO air-on-water tanks, it fully utilizes the whole internal volume of water storage through the elastic wall, which separates source water from purified water.

IAM is a manufacturing technology of a water filtration medium with high-density fine absorbents. When Aqualen™ is mixed with granulated absorbents, IAM technology creates a synergistic effect, which means that the sorption mixture attains the unique qualities not present in the original components. IAM prevents the channeling effect and ensures uniform water flow distribution throughout the filter.

Product	Description	Price
<p>RO 206s - HoReCa</p> 	<ul style="list-style-type: none"> • Replacement filters cartridges K1.K2,RO150,RO150 1 pc • Drinking water tap • Built-in electric pressure pump • Automatic reminder with light and sound indication helps to keep track of timely filter replacement • Clean water storage tank 5 L • 47.2 l/h for 2 membrane cartridges • Overall dimensions (length x height x width) : 411 x 486 x 195 mm • Water supply pressure min – max 0.9 – 6.3 bar • Filtered water temperature +5 to +38 Celsius • Reverse osmosis maximum efficiency rate (at +25 and 4 bar) • Treated/drained water ratio 1:2 • Weight, not more than 12kg • Input voltage 100 -240 V AC • Output voltage 24 V DC 	<p>€ 503.36</p>

RO 206s – HoReCa replacement cartridges

<p>K5 cartridge</p> 	<p>PRIMARY PURIFICATION OF DRINKING WATER</p> <ul style="list-style-type: none"> • Sediment filter cartridge pre-filtration. • Manufactured from 100% Polypropylene. • It is used to retain dirt and other sediment particles in the incoming water • 5 microns in size 	<p>€ 12.61</p>
---	--	-----------------------

<p>K2 cartridge</p> 	<p>FINE SORPTION POST-PURIFICATION OF DRINKING WATER</p> <ul style="list-style-type: none"> • Using the optimal combination of powder and fibrous sorbents it effectively reduces active chlorine, ions of heavy metals and organic compounds. • The cartridge is manufactured according to the carbon-block technology as a filter matrix media composed of the ion-exchange fiber AQUALEN™ with the increased content of activated coconut carbon for better sorption properties. • As a bactericide the cartridge contains cluster microcrystalline silver • 3 microns in size 	<p>€ 14.71</p>
---	--	-----------------------

<p>RO150S cartridge</p> 	<p>REVERSE OSMOSIS MEMBRANE PROVIDES ULTRAFILTRATION OF ALL CONTAMINANTS INCLUDING CYSTS, BACTERIA AND VIRUSES</p> <ul style="list-style-type: none"> • It also removes water hardness from any initial level. • This membrane has the performance of 23.7 liters per hour. • 0.0001 microns in size • Coffee machines, electric kettles, and other kitchenware may suffer from scale build-ups and film formation. • Soft and moderately remineralized water improves the taste of food and is recommended for children, people with allergies, coffee lovers and gourmets. 	<p>€ 94.54</p>
---	--	-----------------------

<p>RO150S cartridge</p> 	<p>REVERSE OSMOSIS MEMBRANE PROVIDES ULTRAFILTRATION OF ALL CONTAMINANTS INCLUDING CYSTS, BACTERIA AND VIRUSES</p> <ul style="list-style-type: none"> • It also removes water hardness from any initial level. • This membrane has the performance of 23.7 liters per hour. • 0.0001 microns in size • Coffee machines, electric kettles, and other kitchenware may suffer from scale build-ups and film formation. • Soft and moderately remineralized water improves the taste of food and is recommended for children, people with allergies, coffee lovers and gourmets. 	<p>€ 94.54</p>

APRO-MCR 100 provides drinking water with up to 50% energy savings. A feasible deal to keep operating costs at a reasonable level. • Permeate Flow, LPH 90 • Membrane Quantity 2 • Membrane Size, inch 2 x 3013 • Max inlet TDS, ppm 1500 • Reduction of salt content, % Up to 95 • System recovery, % 50 • Input pressure, bar 1 - 4 • Power consumption, Wt 100 • Power supply 24VDC (AC/DC adapter is installed) • Dimensions (LxWxH), mm 490 x 470 x 555 	<p>€ 1554.62</p>
<p>ULP3012-400</p> 	<ul style="list-style-type: none"> • Membrane ULP3012-400 AP.RO MCR-90 • Reverse osmosis membrane provides ultrafiltration of all contaminants including cysts, bacteria and viruses. It also removes water hardness from any initial level. • This membrane has the performance of 45.6 liters per hour. • Hard water distorts the taste of food, coffee, and tea and poses a threat to many home appliances. • Coffee machines, electric kettles, and other kitchenware may suffer from scale build-ups and film formation 	<p>€ 54.62</p>
<p>Softener & iron remover A1000</p> 	<ul style="list-style-type: none"> • Media type/Amount: Fine mesh resin 30L • Water softening, high iron and manganese removal • Maximum Compensated Hardness, gpg 70 (1540ppm) • Maximum Ferrous Iron Reduction, ppm 10 • Minimum pH, standard units 7 • Water & Ambient Temperature Minimum-Maximum (4°-49°) • Water Pressure Minimum - Maximum, (bar) 1,4 - 7 • Controller Type Metered • Electrical Rating 12VAC, 50/60 Hz, 0.015 kW-hr • Plumbing Connections (NPT) 1 inch male (MNPT) • Height (cm) 79.6 / Footprint (cm) 40.4 x 48.5 	<p>€ 747.90</p>
<p>Softener & iron remover A800</p> 	<ul style="list-style-type: none"> • Media type/Amount: Fine mesh resin 24L • Water softening, high iron and manganese removal • Maximum Compensated Hardness, gpg 70 (1200ppm) • Maximum Ferrous Iron Reduction, ppm 10 • Minimum pH, standard units 7 • Water & Ambient Temperature Minimum-Maximum (4°-49°) • Water Pressure Minimum - Maximum, (bar) 1,4 - 7 • Controller Type Metered • Electrical Rating 12VAC, 50/60 Hz, 0.015 kW-hr • Plumbing Connections (NPT) 1 inch male (MNPT) • Height (cm) 70.6 / Footprint (cm) 40.4 x 48.5 	<p>€ 663.87</p>
<p>Sodium chloride</p> 	<ul style="list-style-type: none"> • Salt for water softener • Net weight, Kg 20 • Cube style 	<p>€ 6.72</p>

Product	Description	Price
<p>Viking maxi</p> 	<ul style="list-style-type: none"> • Stainless steel filter housing of in-line whole house purification system Aquaphor Viking. • Can be equipped with sediment or carbon-fiber filters of different porosity and flow rate. • Designed for easier installation and maintenance. • Withstands high pressure in water main. • Lasts for up to ten years. • For cold water • Housing material stainless steel • Overall Dimensions (length x height x width) : 180 x 595 x 180 mm • Max. pressure, MPa/bar 6,5 / 0,63 • Filtration rate , L/min up to 25 • Replacement of filter cartridges filter life depends on a cartridge used 	<p>€ 242.86</p>
Viking maxi replacement cartridges		
<p>B520-13 Carb fiber block</p> 	<ul style="list-style-type: none"> • A replacement filter for cold water purification in the entire home. • Its unique structure and design allow the module to remove sediments, chlorine, heavy metals and other impurities from the water. • The cartridge is manufactured according to the carbon-block technology • the ion-exchange Aqualen fibers deeply and irreversibly purify the water from heavy metals • The replacement filter contains silver in its active ionic form. • it filters particles down to 5 micron in size. • Filter life, L 100000 	<p>€ 92.44</p>
<p>B150 plus Carb fiber block</p> 	<ul style="list-style-type: none"> • A replacement filter for drinking water purification. • Thanks to the unique coaxial structure and gradient porosity of the module, virtually all harmful impurities are removed from the water. • The cartridge is manufactured according to the carbon-block technology • the ion-exchange Aqualen fibers deeply and irreversibly purify the water from heavy metals • The replacement filter contains silver in its active ionic form. • It has a particularly long lifetime. • it filters particles down to 1 micron in size. • Filter life, L 40000 	<p>€ 117.65</p>
<p>Polypropylene B520 PX5</p> 	<ul style="list-style-type: none"> • A replacement polypropylene filter for mechanical pre-treatment • Replacement sediment filter manufactured from 100% Polypropylene. • Polypropylene pre-filters for reducing sand, rust, silt and other sediment • Fits standard housing Viking maxi • Effectively reduce micro particles down to 5 micron in size. • Gradient texture increases dirt retention capacity and filter life. • Require replacement depend on main water supply quality. 	<p>€ 37.82</p>

<p>Viking midi</p> 	<ul style="list-style-type: none"> • Stainless steel filter housing of in-line whole house purification system Aquaphor Viking. • Can be equipped with sediment or carbon-fiber filters of different porosity and flow rate. • Designed for easier installation and maintenance. • Withstands high pressure in water main. • Lasts for up to ten years. • For cold water • Housing material stainless steel • Overall Dimensions (length x height x width) : 180 x 425 x 180 mm • Max. pressure, MPa/bar6,5 / 0,63 • Filtration rate , L/min up to 15 • Replacement of filter cartridges filter life depends on a cartridge used 	<p>€ 226.05</p>
Viking midi replacement cartridges		
<p>B515-13 Carb fiber block</p> 	<ul style="list-style-type: none"> • A replacement filter for cold water purification in the entire home. • Its unique structure and design allow the module to remove sediments, chlorine, heavy metals and other impurities from the water. • The cartridge is manufactured according to the carbon-block technology • the ion-exchange Aqualen fibers deeply and irreversibly purify the water from heavy metals • The replacement filter contains silver in its active ionic form. • it filters particles down to 5 micron in size. • Filter life, L 60000 	<p>€ 71.43</p>
<p>B150 midi Carb fiber block</p> 	<ul style="list-style-type: none"> • A replacement filter for drinking water purification. • Thanks to the unique coaxial structure and gradient porosity of the module, virtually all harmful impurities are removed from the water. • The cartridge is manufactured according to the carbon-block technology • the ion-exchange Aqualen fibers deeply and irreversibly purify the water from heavy metals • The replacement filter contains silver in its active ionic form. • it filters particles down to 1 micron in size. • Filter life, L 30000 	<p>€ 79.83</p>
<p>Viking mini</p> 	<ul style="list-style-type: none"> • Stainless steel filter housing of in-line whole house purification system Aquaphor Viking. • Withstands high pressure in water main. • Lasts for up to ten years. • For cold water & hot water • Housing material stainless steel • Overall Dimensions (length x height x width) : 180 x 255 x 180 mm • Max. pressure, MPa/bar6,5 / 0,63 • Filtration rate, L/min up to 10 • Replacement of filter cartridges filter life depends on a cartridge used 	<p>€ 200.84</p>
Viking mini replacement cartridges		
<p>B505-13 Carb fiber block</p> 	<ul style="list-style-type: none"> • A replacement filter for cold water purification in the entire home. • Its unique structure and design allow the module to remove sediments, chlorine, heavy metals and other impurities from the water. • Designed with CarbFiber Block technology. • The replacement filter contains silver in its active ionic form. • it filters particles down to 5 micron in size. • Filter life, L30000 	<p>€ 50.42</p>
<p>B505-43 Carb fiber block</p> 	<ul style="list-style-type: none"> • A replacement filter for hot water purification in the entire home • Its unique structure and design allow the module to remove sediments, chlorine, heavy metals and other impurities from the water. • Designed with CarbFiber Block technology • The replacement filter contains silver in its active ionic form. • it filters particles down to 5 micron in size. • Filter life, L15000 	<p>€ 54.62</p>

Product	Description	Price
<p>Favorite</p> 	<ul style="list-style-type: none"> • Drinking water tap • Housing material steel • Filtration rate , L/min 2.5 • System type sorption • Takes little place under the sink • Removes chlorine, heavy metals, pesticides, petroleum products, and other common toxins and allergens • Filter life, L 12000 • Replacement of filter cartridges once a year or upon reaching the filter life limit (whichever is earlier) • Dimensions mm : (Length x Width x Height) 180 x 180 x 200 	<p>€ 159.66</p>
Favorite replacement cartridge		
<p>B150</p> 	<ul style="list-style-type: none"> • It filters particles down to 0.8 micron in size. • Due to its unique coaxial design and gradient porosity, tap water is purified from a majority of contaminants. • B150 exhibits outstandingly long filtration life. The ion-exchange fibrous sorbent Aqualen™ with its modified selective chelating groups, profoundly and irreversibly purifies water from heavy metals. • Contains silver in its active ionic form. 	<p>€ 54.62</p>
<p>Modern</p> 	<ul style="list-style-type: none"> • Drinking water tap • Filtration rate , L/min 1,0-1,2 • Easy to use on the road • Removes chlorine, heavy metals, pesticides, petroleum products, and other common toxins and allergens • Replacement of filter cartridges once a year or upon reaching the filter life limit • Filter life indicator mechanical 	<p>€ 31.93</p>
Modern replacement cartridge		
<p>B200H</p> 	<ul style="list-style-type: none"> • A set of universal replacement filters for the Aquaphor Modern faucet filter. • The filling is a patented combination of fibrous and granular adsorbents baked into carbon block with the use of DFS technology. • Dense structure requires using the water-supply line pressure and effectively removes virtually all harmful impurities from the water. • Filter life, L4000 	<p>€ 16.81</p>
<p>Amethyst 2.8L</p> 	<ul style="list-style-type: none"> • Amethyst is a handy water filter jug with a simple design and is comfortable to look at and use daily. • Compact and ergonomic, with its moderate color line, Amethyst jug fits inside the refrigerator door for even greater space efficiency. • All parts of the product are produced of food-grade materials and are BPA-free. • Filter jug capacity, L2,8 • Lid type Slider 	<p>€ 12.61</p>
Amethyst replacement cartridge		
<p>B25</p> 	<ul style="list-style-type: none"> • The replacement filter in our popular oval fit irreversibly reduces harmful substances such as organic compounds, iron, lead and chlorine, removes sediment and odor. • Box include 3 pcs • Filter life, L 200 	<p>€ 10.08</p>
