

“MISSION”

Woodberry Farms LLP is dedicated to unlocking the untapped economic vitality of India's underutilized agricultural and plantation lands—reviving abandoned estates of spices, nutmeg, vanilla, tea, coffee, cardamom, and more—through an innovative, asset-light "Farming-as-a-Service" (FaaS) model. By harnessing cutting-edge satellite precision farming, in-house R&D, and sustainable practices, we dismantle barriers like land fragmentation, labor shortages, and soaring costs, transforming dormant assets into high-yield, resilient agro-estates. Landowners, NRIs, and communities gain hassle-free, passive annual returns without upfront investment, while we pioneer ecological restoration and profitability in a fragmented agrarian landscape.

“VISION”

Woodbery Farms LLP aspires to spearhead the ecological and economic renaissance of India's plantation heritage, emerging as the premier integrated agricultural powerhouse across the Western Ghats and beyond. We envision a thriving network of technology-fueled, community-rooted farms that set global benchmarks for sustainable innovation—leading in carbon credits, risk-resilient operations, and value creation. By catalyzing a modern, prosperous agrarian ecosystem, Woodbery will empower landowners with enduring wealth, foster regional prosperity, and redefine agriculture as a beacon of efficiency, equity, and environmental stewardship for generations to come.
