For Creative Generations, The "Likeness-Bearers"

(318)350-3905
Eros, LA
West Ouachita

Dear Community Member:

The launch of Creative Works of Louisiana (CWL) The Rebirth, 2027, is happening now in Northeast Louisiana with future plans for South Louisiana. Certain areas are under-served and lack resources to invigorate creativity for both young and old.

I am the Founding Director, Kattina Trosclair, in which this Vision/Mission began in the late 1980s. With CWL having success from 2012 to 2018, I was guided to a 7 year break off of electronics, strenuous work, and was simply away for a while. CWL is re-emerging stronger now in 2026! The business reopened in my son's name and we are building a foundation for the next generations to have something to fall back on, which we did not have, nor our parents.

Instead of selling T-shirts and promotional items this time to pay for the creative events, we are now providing digital marketing and "create & educate" tiers. We're wanting to help our future entrepreneurs, creatives and community supporters, have the ability to create, using their creativity, their natural talents and explore avenues to make money doing it. We want to be able to put the tools in their hands and enhance their arts or whatever is their passion, so they truly reflect the likeness-bearer they are. Being able to create, feeling valued, gain self-worth and experience inclusion in the digital, fast-paced world we live in.

With a history of desktop publishing, early entrepreneurship, graphic design and printing, I have been able to save by doing in-house printing, design and publications. It was always a sideline work for me bringing in funds so I could write and do other community work. Now I have learned some options on how to do the creative side and bring in dollars at events etc. I want to teach what I know, kind of like it was years ago! The educate piece will offer classes and licensing for Adobe Creative Cloud, in whichever aspect the client wants to learn. Licensing is per user, we still have to sort out how to set this up for larger use. I want to teach our youth the ability to use AI as a tool for good and use it responsibly. And then whatever educational needs they have for their creative art provide those tools, travel, fees, etc.

Any guidance and assistance at this time would be greatly appreciated. This mission is way bigger now than before. We are doing it for younger generations and work to encourage them to be a part of this movement, supporting natural gifts and talents. My son works 28 and 14 on tug boats and hopefully one day we can get him off the boat so he doesn't have to be spending his life away on the rivers to make a good living like his grandfather lived. My son is a guitarist and would like to build guitars, which is a lucrative business and craft! This is what we want to assist Louisianians first then expand nationally. Please help us with this needed work for the future. Thank you for listening. I appreciate it and hope you have a wonderful day. God bless you and PLEASE spread the Word!

We do Loud in the Library with Ouachita Parish Library and there are videos of Recent Open Mics and an old channel no longer accessible with events CWL hosted in 2016 and 2017. Find more info about us as we are in the re-birthing stages now. Thank you and God Bless you.

Sincerely,

Kattina T. Trosclair
