

Position 1
Trade Operations Specialist (onsite)

Job Description:

Estimated Duration: 12 months with possible extensions

Work Setting: 100% of the time at the Client's site. No telecommuting or remote work. This is a non-negotiable requirement from the client

Required:

- Availability to work 100% of the time at the Client's site in Juno Beach, FL (required);
- Experience with entering trades into SOX Application and executes the end-of-day recaps and reports.
- Experience in verifying positions, monitoring daily Value at Risk and other risk related measures.
- Experience providing management with daily Profit and Loss and pricing information.
- Experience handling Electronic Funds Sources and other clearing transactions.
- Experience supporting the development and execution as needed for the trade capture platform in close collaboration with IT Team.
- Experience with reports development using SQL & Power BI

Responsibilities:

- Enter trades into the SOX application and execute end-of-day recaps and reports.
- Verify positions and monitor daily Value at Risk (VaR) and other risk-related measures.
- Reconcile broker and other external statements related to transactions.
- Provide management with daily P&L and pricing information.
- Engage with external counterparties to legally confirm transactions and actively work towards resolving disputes when necessary.
- Develop and enhance the team's reporting infrastructure and data visualization capabilities to support informed decision-making.
- Collaborate with origination, risk management, trading, legal, and accounting departments to assess and evaluate risks associated with potential transactions, new business initiatives, and onboarding new counterparties.

Why apply?

- Gain experience with one of the world's largest solar and wind energy providers, which last year briefly became the most valued U.S. energy company;
- Work with a great team of professionals and learn the newest technologies and approaches;
- Enjoy our Client's wonderful campus with top-notch facilities for work and recreation;
- Benefit from multiple project extensions;

Position 2
Network Engineer (onsite)

Job Description:

Estimated Duration: 12+ months with possible extensions

Work Setting: 100% of the time at the Client's site. No telecommuting or remote work. This is a non-negotiable requirement from the client

Required:

- Availability to work 100% of the time at the Client's site in Ocoee, FL (required)
- Experience in IT work in infrastructure/network environments in network operations, support, maintenance, and administration (7+ years);
- Experience in enterprise networking (3+ years);
- Experience in cloud networking;
- Experience with end-to-end network infrastructure, including DMARC to workstations, fiber distribution, routers, switches, DHCP, and topology, ensuring excellent Quality of Service (QoS);
- Cisco certifications: Cisco Certified Network Professional (CCNP) or Cisco Certified Design Professional (CCDP) or Cisco Certified Security Professional (CCSP) or Cisco Certified Voice Professional (CCVP).

Preferred:

- Experience with HPE/Aruba networking equipment.

Responsibilities:

- Responsible for strategic planning, design, and optimization on network infrastructure;
- Develops cutting-edge network solutions using current and emerging technologies, including copper, fiber, and wireless infrastructure;
- Translates business needs into effective network architecture, recommending hardware, software, and design strategies;
- Manages configuration and maintenance of routers, switches, and wireless access points;
- Evaluates and recommends new products while staying updated on emerging technologies;
- Proactively monitors network performance, conducts capacity planning, and offers improvement suggestions. Proficient in troubleshooting and devising resolution protocols;
- Ability to lift 50 pounds when necessary.

Position 3
Senior Metering Project Engineer (Hybrid)

Job Description:

Estimated Duration: 12 months with possible extensions

Work Setting: Hybrid Schedule. Remote option will be considered.

Required:

- Experience in relevant P&C/Substation Engineering (3+ years, 5+ years preferred);
- Project Management experience (2+ years preferred);
- Metering experience (ability to read protection & control drawings, understanding of instrument transformers including type, accuracy, & burden (CT, PTs, CVTs), familiarity with a variety of metering technologies with a focus on Schneider Electric ION-8650 meters, understanding of meter to meter (peer to peer) schemes, familiarity with iron (Fe) and copper (Cu) loss compensation methods for transformers, generator tie line loss compensation, sharing losses amongst different technologies or PPA customers, and the ability to program meters or create metering templates) (3-5 years);
- Experience coordinating a wide variety of stake holders;
- Experience managing third party engineering companies;
- Bachelor's in Engineering, Electrical Engineering or Master's – Engineering Management preferred.

Preferred:

- Experience with commercial/contractual agreements;
- Experience working for an Independent System Operator (ISO) (IE: SPP, MISO, CAISO, etc);
- Experience with Reviewing Large Generator Interconnection Agreements (LGIAs)
- Experience with Reviewing Power Purchase Agreements (PPAs)
- Experience with Retail service provider agreements
- Experience with Communication protocols such as modbus, DNP3, MV90
- Experience with SE ION-8650 meters
- Experience with Schneider's ION Setup & PME Software Suites
- Experience with SEL-735 meters
- Experience with SEL's AcSELERator Software
- Experience with Orion LX interface
- Experience with IEEE-519 2014 Harmonic Standard
- Valid driver's license and good driving record
- PMP Certification

Responsibilities:

- Interpret and organize customer, commercial, and internal metering requirements.
- Coordinate cross functional teams for the execution of technical metering documents and implementation of metering requirements into engineering design.
- Evaluate, select, and apply diversified knowledge of metering concepts and best practices to a broad variety of projects.
- Oversee the work of external Metering EORs and perform project management duties.
- Provide engineering, design, and development support.
- Track and report on project contractual execution and design progress.
- Deliver company standards, policies, and support of organization.

Why apply?

- Gain experience with one of the world's largest solar and wind energy providers, which last year briefly became the most valued U.S. energy company;
- Work with a great team of professionals and learn newest technologies and approaches;
- Enjoy our Client's wonderful campus with top-notch facilities for work and recreation;

- Benefit from multiple projects extensions;

Position 4
Contract Manager (onsite)

Job Description:

Estimated Duration: 12 months with possible extensions

Work Setting: 100% of the time at the Client's site. No telecommuting or remote work. This is a non-negotiable requirement from the client.

Required:

- Availability to work 100% of the time at the Client's site in Boca Raton, FL (required);
- Business or technical writing experience (3+ years);
- Procurement processes/documentation experience (3+ years);
- Government experience;

Preferred:

- Experience with paralegal or legal concepts.

Responsibilities include but are not limited to the following:

- Draft and review documentation related to but not limited to, procurement activities, such as purchase orders, service agreements, vendor contracts, modifications, and amendments;
- Create contract documentation, including the development of the scope of services, performance requirements, and terms and conditions;
- Develop language that defines the delivery, service, quality, and pricing for services or products procured;
- Ensure language is clear and consistent and coordinates with all business units and stakeholders to ensure all protocols, procedures, and requirements are developed in accordance with the Client's needs;
- Maintenance of an internal documentation library, providing and/or coordinating special documentation services as required, and oversight of special projects as needed;
- Must have strong organizational and project management skills and excellent writing and editing skills.

Position 5
Lead Project Estimator (onsite)

Job Description:

Estimated Duration: 12+ months with possible extensions

Work Setting: 100% of the time at the Client's site. No telecommuting or remote work. This is a non-negotiable requirement from the client

Required:

- Availability to work 100% of the time at the Client's site in Juno Beach, FL (required);
- Availability for occasional travel to project sites for meetings, inspections, and collaboration with on-site teams;
- Experience in project estimating, with a focus on conceptual engineering and project design (7+ years);
- Experience in utility-scale energy projects, including renewable energy, power generation, and transmission infrastructure;
- Experience in value engineering principles and practices;
- Experience in construction methods, materials, and equipment;
- Experience with industry standards and best practices in project estimating and cost management;
- Experience with Microsoft Office Suite, particularly Excel;
- Bachelor's degree in Engineering, Construction Management, or a related field.

Preferred:

- Experience in project estimating, with a focus on conceptual engineering and project design (10+ years);
- Experience in field engineering or construction management (3+ years);
- Experience with cost estimation software and tools (e.g., PlanSwift, WinEst, CostX, or similar);
- Experience with project management software such as MS Project or Primavera P6;
- Master's or Post-Graduate Degree in Engineering, Construction Management, Business or a related field;
- Certified Estimating Professional (CEP) or Certified Cost Professional (CCP).

Responsibilities:

- Lead the development of detailed project cost estimates, including conceptual, preliminary, and definitive estimates for new and existing projects;
- Perform conceptual engineering design and develop preliminary construction plans to support estimating scope quantification;
- Collaborate with engineering, procurement, and construction teams to gather and analyze project specifications, drawings, and other documentation to prepare accurate estimates;
- Perform value engineering analysis to identify cost-saving opportunities while maintaining quality and project requirements;
- Develop and maintain estimation tools, databases, and methodologies to enhance the accuracy and efficiency of cost estimating processes;
- Conduct risk assessments and develop contingency plans to account for potential project uncertainties;
- Present cost estimates and value engineering options to senior management, project stakeholders, and clients.

Why apply?

- Gain experience with one of the world's largest solar and wind energy providers, which last year briefly became the most valued U.S. energy company;
- Work with a great team of professionals and learn newest technologies and approaches;
- Enjoy our Client's wonderful campus with top-notch facilities for work and recreation;
- Benefit from multiple projects extensions;

Position 6
.Net Developer (remote option)

Job Description:

Estimated Duration: 12+ months with possible extensions

Work Setting: 100% of the time at the Client's site. No telecommuting or remote work. This is a non-negotiable requirement from the client

Required:

- Availability to work 100% of the time at the Client's site in Tallahassee, FL;
- Experience in design and/or development with .NET, C#, ASP.NET, Oracle, and Structured Query Language (SQL) Server in an n-tier architecture (10+ years);
- Experience with .Net 4.5 and higher (10+ years);
- Experience with Visual Studio 2015 or higher (10+ years);
- Experience with .NET 8.0, ASP.NET MVC Razor pages for developing dynamic web applications (10+ years);
- Experience with database design and development (Oracle/Microsoft SQL Server);
- Experience with SQL tuning;
- Experience with development source control (Azure Dev Ops);
- Experience as a project leader on multiple IT projects;
- Experience as an expert/lead technical role;
- Experience working various projects/issues of high complexity that require in-depth knowledge across multiple technical areas and business segments;
- Experience in state-of-the-art programming languages and object-oriented;
- Experience with Software Development Life Cycle and Agile methodologies approaches in designing, coding, testing, and debugging programs;
- Experience with support production deployments and assisting with troubleshooting deployment issues;
- Experience assisting with branching/merging in support of parallel development requirements;
- Experience with setting up continuous integration capabilities;
- Experience with setting up builds, transformations and deployment configurations for each environment;
- Experience in writing technical documentation;
- Experience with Bootstrap, jQuery and other mobile friendly interfaces for responsive UI;
- Experience with Angular JS to create interactive and data driven applications;
- Experience in Oracle Database management and TSQL for data manipulation and retrieval;
- Experience with Azure DevOps for continuous integration and deployment, and Azure App Services for deploying cloud-native applications;
- Experience in using wireframe software to create prototypes;
- Experience with NLog for application logging and IText for generating pdf documents;
- Experience with ADA compliance and ADA Widget, as well as experience with tools and techniques for ensuring web accessibility;
- Experience implementing analytics solutions and use Redis and Elastic Search for distributed caching to enhance application speed and reliability.

For C4244:

- Experience with object-oriented development techniques;

For C4243:

- Experience in design and/or development with .NET, C#, ASP.NET, Oracle, and Structured Query Language (SQL) Server in an n-tier architecture (7+ years);
- Experience with .NET 8.0, ASP.NET MVC Razor pages for developing dynamic web applications (7+ years);

- Experience in analysis, design and development of enterprise applications using OpenText ExStream Software technologies (5+ years);

For C4242:

- Experience in designing and implementing real-time data ingestion pipelines using Striim to stream data from Oracle DB to Snowflake (5+ years);
- Experience in developing scalable ETL workflows using Alteryx to clean, transform, and enrich data for reporting and analysis (5+ years);
- Experience developing reports and dashboards in Tableau, leveraging Snowflake as backend (5+ years);
- Experience optimizing queries and data models in Snowflake DB;
- Experience working with ETA reports and reporting standards;

Responsibilities:

- Provide IT support for the .Net systems;
- Provide services for the Multi Language Translation (MLT) framework;
- Provide design recommendations based on long-term IT organization strategy;
- Develop enterprise level application and custom integration solutions including major enhancements and interfaces, functions, and features;
- Use a variety of platforms to provide automated systems applications to customers;
- Provide expertise regarding the integration of applications across Commerce;
- Determine specifications, then plan, design, and develop the most complex and business critical software solutions, utilizing appropriate software engineering processes.

Position 7
PeopleSoft FSCM Systems Analyst (hybrid)

Job Description:

Estimated Duration: 12 months with possible extensions

Work Setting: Position will be 4 days remote with 1 day (Thurs.) required to be onsite at the location listed above.

Required:

- Availability to work 1 day/week at the Client's site in Austin, TX (required);
- Experience as a business analyst with PeopleSoft FSCM 9.2 (8+ years);
- Experience as a business analyst, specifically in Accounts Receivable and Billing module implementations (8+ years);
- Experience as a business analyst in gathering requirements and conducting fit/gap analysis with subject matter experts (8+ years);
- Experience in performing hands-on end-to-end system integration testing with third-party interfaces (8+ years);
- Experience with Microsoft O365 applications (Word, Excel, PowerPoint, Visio) (4+ years);
- Experience working with MS Teams in a large team setting (2+ years)

Preferred:

- Experience working with a public sector organization (Federal, State, or Local Government) (4+ years);
- Experience working with the Texas Comptroller of Public Accounts (CPA) CAPPS Financials system (2+ years);
- Experience with PeopleSoft Approval Workflow Engine (AWE) (2+ years);
- Experience with SharePoint (2+ years);
- Experience with Jira (1+ years);
- Experience working with the Scrum framework (1+ years);
- Experience with STAT (1+ years).

Responsibilities include but are not limited to the following:

- Analyze business objectives and problems to identify alternative solutions and perform cost/benefit analysis.

- Gather and evaluate user requirements, procedures, and operational challenges to improve or automate business processes.
- Collaborate with personnel across departments to understand current workflows and define input/output specifications, report formats, and system needs.
- Document detailed user needs and functional specifications for new or modified computer systems and programs.
- Assess system capabilities, limitations, and timelines to determine the feasibility of implementing requested changes within the existing infrastructure.
- Lead the implementation of PeopleSoft FSCM 9.2 Accounts Receivable and Billing modules, including fit-gap analysis and data mapping to legacy and third-party systems.
- Communicate effectively with cross-functional, remote teams and stakeholders to ensure project alignment and successful system integration.

Position 8
Quality Assurance Analyst (remote option)

Job Description:

Estimated Duration: 6+ months

Work Setting: Remote option. If required, the consultant has to report at the Client's site.

Required:

- Availability to work 100% of the time at the Client's site in Orlando, FL (required);
- Experience with software testing (5+ years);
- Experience with conducting User Acceptance Testing (UAT);
- Experience with Enterprise Resource Planning (ERP) solutions (PeopleSoft, SAP, Oracle Financials, etc.);
- Experience with requirements analysis;
- Experience working with a cross-functional team;
- Experience managing multiple projects and priorities simultaneously;
- Bachelor's Degree in Computer Science, Information Systems, or similar, or equivalent work experience.

Preferred:

- Experience with SAP Ariba;
- Experience in reports, stored procedures, jobs, and data warehouse testing;
- Experience with Application Lifecycle Management (ALM) to manage testing and test reporting.

Responsibilities:

- Involved in test planning, writing test cases/scripts, and test execution;
- Coordinate user acceptance testing with business stakeholders for projects, as needed;
- Define and track quality assurance metrics such as defects, defect counts, test results, and test status;
- Collect and analyze data for software process evaluation and improvements, and integrate them into business processes to address the business needs;
- Document all issues and assists in their resolution;
- Perform quality audits for the project to ensure quality standards, procedures, and methodologies are being followed;
- Hold and facilitate test plan/case reviews with cross-functional team members.

Position 3
Business Process Consultant (onsite)

Job Description:

Estimated Duration: 12+ months with possible extensions

Work Setting: 100% of the time at the Client's site. No telecommuting or remote work. This is a non-negotiable requirement from the client

Required:

- Availability to work 100% of the time at the Client's site in Tallahassee, FL (required);
- IT experience (7+ years);
- Experience in process engineering (4 years);
- Experience in project management (2 years);
- Bachelor's degree in computer science, information systems, business administration or other related fields or relevant experience.

Preferred:

- Experience working with State government;
- Experience working with functional owners of a business process/system;
- Experience working with PeopleSoft;
- Experience working with a functional owner of a business process/system to communicate and clarify customer requirements, processes and understanding of technical concepts;
- Experience in business processes related to accounting, payroll, or financial management;
- Experience with generally accepted accounting principles;
- Ability to perform tasks onsite at Client's locations;
- PMP certification.

Responsibilities:

- Engineering business processes;
- Communicating and clarifying customer requirements, processes and understanding of technical concepts;
- Analyze existing business processes and workflows to identify areas for improvement and recommend optimized solutions aligned with system capabilities and business goals;
- Collaborate with cross-functional teams, including IT, finance, and HR, to align business requirements with PeopleSoft system functionalities;
- Develop and document functional specifications, test plans, and process maps to ensure consistency and alignment with stakeholder expectations;
- Facilitate and lead user acceptance testing (UAT) sessions and support end users during testing and post-implementation phases;
- Monitor project deliverables and timelines, ensuring compliance with project scope, schedule, and quality standards through regular status reporting and issue resolution.

Why apply?

- Gain experience in the company where employees represent a true diversity of backgrounds and talents and are the agency's most valuable assets;
- Enjoy an enriching professional and supportive work environment with generous benefits;
- Receive access to great educational resources on financial security and benefit from investing in your own financial state with every hour of your work with this Client;
- Work with a great team of professionals in a friendly and relaxed work atmosphere;
- Benefit from multiple project extensions;

Position 4
Senior Network Security Engineer (Onsite)

Job Description:

Estimated Duration: 12 months with possible extensions

Work Setting: 100% of the time at the Client's site. No telecommuting or remote work. This is a non-negotiable requirement from the client

Required:

- Availability to work 100% of the time at the Client's site in Ocoee, FL (required);
- Network engineering experience (5 years);
- Layer 2/3 routing protocols including troubleshooting complex issue (5 -7 years);
- Experience Deployment and management of routers;
- Experience with private, public, and hybrid cloud infrastructures such as AWS, Azure platforms (5-7 years);
- Experience with Unix (RedHat), Windows, VMWare, and other platforms (5-7 years);
- Cisco Certified Network Associate (CCNA) and Cisco Certified Design Associate (CCDA)

Preferred:

- Experience with Cisco Certified Internetwork Expert (CCIE).

Responsibilities include but are not limited to the following:

- Managing network protocols, routers, and switches to maintain operational performance;
- Monitoring and troubleshooting connectivity across multiple network environments;
- Implementing network security controls and ensuring policy and regulatory compliance;
- Reviewing and updating network architecture and failover configurations;
- Creating and maintaining network monitoring dashboards and reports;
- Applying updates and patches to network hardware and related infrastructure;
- Maintaining network documentation, inventory records, and supporting cybersecurity investigations;

Position 5
SAP BW/4HANA Techno-Functional Consultant (onsite)

Job Description:

Estimated Duration: 12 months with possible extensions

Work Setting: 100% of the time at the Client's site. No telecommuting or remote work. This is a non-negotiable requirement from the client

Required:

- Availability to work 100% of the time at the Client's site in Tallahassee, FL (required);
- Experience with SAP BW/4HANA (3+ years);
- Functional SAP experience (3+ years);
- Experience with Full Software Development Life Cycle (SDLC), including: Requirements Gathering; Functional Design Documentation; Resource Planning; User Acceptance / System / Integration Testing; Implementation & Post-Go-Live Support; Ongoing Maintenance and Enhancements (3+ years);
- Experience with SAP Business Warehouse on HANA (BW on HANA) (2+ years);
- Experience with Enterprise Resource Planning (ERP) applications and/or Object-Oriented Analysis and Design principles.

Preferred:

- Experience with Business Warehouse functionality in SAP;
- Experience in Child Support Programs, with understanding of: Federal reporting requirements; Performance accountability measurements;
- SAP BW/4HANA-related certifications.

Responsibilities include but are not limited to the following:

- Assist in the periodic review and revision of the Operations and Maintenance sections of the CAMS Enterprise Project Plan;
- Perform a preliminary impact assessment of any support requests and provide an impact analysis that covers impact to cost, resources, hardware, software, schedule, and any downstream impact to other IT systems, projects or programs as requested;
- Provide reports or opinions as directed by the CAMS Project Manager or designee. These are data to assist in decision making, not changes migrated to production;
- Assist in the proactive management of systems and hardware;
- Assist in the planning, preparation, and release of major and minor updates to existing software and installation of new software;
- Create and modify functional documentation, test system changes, work with external partners to test functionality;
- Research SAP documentation to identify fixes, new functionality and to increase system functionality.

Why apply?

- Gain experience in the company with great work life balance, benefits and time off;
- Enjoy extensive tutoring and many opportunities for education and career advancement;
- Work with a great team of professionals in friendly and relaxed work atmosphere;
- Benefit from multiple projects extensions;

Position 6
Quality Assurance Manager (onsite)

Job Description:

Estimated Duration: 12+ months with possible extensions

Work Setting: 100% of the time at the Client's site. No telecommuting or remote work. This is a non-negotiable requirement from the client

Required:

- Availability to work 100% of the time at the Client's site in Tallahassee, FL (required);
- Experience with systems development and business (7+ years);
- Experience in developing and conducting test processes for multiple types of systems;
- Experience with prior management, supervisory or team leader (5+ years).

Preferred:

- Experience working with State government;
- Experience working with PeopleSoft and with PeopleTools 8.59+;
- Experience with interface, and end-to-end, parallel and user acceptance testing;
- Experience working with a functional owner of a business process/system to communicate and clarify customer requirements, processes and understanding of technical concepts;
- Experience working under the direction of senior level management;
- Experience managing supervisors, project leads and/or technical staff;
- Knowledge of business processes related to accounting, payroll, or financial management;
- Knowledge of generally accepted accounting principles
- Experience with generally accepted accounting principles;
- Ability to perform tasks onsite at Client's locations;
- PMP certification.

Responsibilities:

- Developing and conducting test processes for multiple types of systems;
- Managing supervisors, project leads and/or technical staff;
- Working with functional owner of a business process/system to communicate and clarify customer requirements;
- Overseeing the planning, development, and execution of comprehensive test plans and test cases to ensure system functionality and performance meet client expectations;
- Monitoring and reporting on quality assurance metrics, including defect densities and open defect counts, to ensure continuous improvement and alignment with project goals;
- Collaborating with cross-functional teams to ensure effective integration of quality assurance activities throughout the software development lifecycle;
- Leading root cause analysis and implementing corrective actions for quality-related issues to minimize project risk and maintain high standards.

Why apply?

- Gain experience in the company where employees represent a true diversity of backgrounds and talents and are the agency's most valuable assets;
- Enjoy an enriching professional and supportive work environment with generous benefits;
- Receive access to great educational resources on financial security and benefit from investing in your own financial state with every hour of your work with this Client;
- Work with a great team of professionals in a friendly and relaxed work atmosphere;
- Benefit from multiple project extensions;

Position 7
ServiceNow Engineer (onsite)

Job Description:

Estimated Duration: 12+ months with possible extensions

Work Setting: 100% of the time at the Client's site. No telecommuting or remote work. This is a non-negotiable requirement from the client

Required:

- Availability to work 100% of the time at the Client's site in Tallahassee, FL (required);
- Experience with configuring, designing, and developing in the ServiceNow Platform (3+ years);
- Experience with data extractions and conversions;
- Experience with State and Federal laws applicable to the implementation of an information technology solution;
- Experience in development with JavaScript, HTML, XML, Json, and SQL;
- Experience integrating with Microsoft;
- Experience integrating with a third-party system;
- Experience using Discovery to populate the CMDB and implementing Service Mapping for business service visualization;
- Experience with CSM;
- Project Management experience;
- Experience with State procurement and contract monitoring requirements;
- Experience with industry and State information technology requirements;
- Experience with State procurement and contract monitoring requirements;
- ServiceNow certifications: Certified System Administrator (CSA), Certified Application Developer (CAD).

Preferred:

- Experience with configuring, designing, and developing in the ServiceNow Platform (5+ years);
- Experience in Performance Tuning;
- Experience in Data Security;
- Experience with configuring custom email templates;
- Experience with implementing security policies using ACLs (Access Control Lists), roles, groups, and authentication mechanisms;
- ServiceNow certifications: Certified Implementation Specialist – IT Service Management (CIS-ITSM), Certified Implementation Specialist – Customer Service Management (CIS-CSM).

Responsibilities:

- Configuring, integrating and implementing ServiceNow activities
- Developing ServiceNow workflows and flows
- Implementing and configuring the Service Level Management platform from ServiceNow
- Configuring dashboards, automated workflows, flows, self-service portal, live chat, and virtual agent
- Performing ServiceNow CSM upgrades, including module configuration, integration testing, and customizations
- Participating in defect management and triage functions, working cross-functionally to resolve issues
- Maintaining detailed documentation of application design and code generation techniques

Why apply?

- Gain experience in the company where employees represent a true diversity of backgrounds and talents and are the agency's most valuable assets;
- Enjoy an enriching professional and supportive work environment with generous benefits;

- Receive access to great educational resources on financial security and benefit from investing in your own financial state with every hour of your work with this Client;
- Work with a great team of professionals in a friendly and relaxed work atmosphere;
- Benefit from multiple project extensions;

Position 8
Systems Administrator (onsite)

Job Description:

Estimated Duration: 12+ months with possible extensions

Work Setting: 100% of the time at the Client's site in Tallahassee, Florida. No telecommuting or remote work. This is a non-negotiable requirement from the client.

Required:

- Availability to work at the Client's site in Tallahassee, FL (required);
- Experience with Server 2012 R2, 2016, 2019, and 2022 (2-3 years);
- Experience in IIS Administration (2-3 years);
- Experience with network communications, including TCP/IP and DNS Samba/CIFS file sharing and NTFS permissions (2-3 years);
- IT work experience in infrastructure/network environments in systems operations, support, maintenance, and administration (3-5 years);
- Experience in information systems engineering or another related field (5-8 years);
- Experience with Linux (Redhat and Ubuntu).

Preferred:

- Experience with Microsoft Azure cloud systems (2-3 years);
- Experience with other cloud providers, such as AWS or GCP (2-3 years);
- Experience in the administration of Microsoft software (2-3 years);
- Experience in supporting middleware such as API Management, IT Service Automation tools, and batch job services (3-5 years).

Responsibilities:

- Support and expand infrastructure;
- Coordinate server configuration and administration with multiple parties;
- Make recommendations for future server and software upgrades;
- Monitor systems and applications to ensure security, availability, and performance;
- Establish systems by evaluating network performance issues including availability, utilization, throughput, goodput, and latency; planning and executing the selection, installation, configuration, and testing of equipment; defining network policies and procedures; establishing connections and firewalls;
- Maintain network and systems performance by performing systems monitoring and analysis, and performance tuning; troubleshooting systems and application problems; escalating problems to vendor;
- Build and manage relationships in a matrixed environment.

Why apply?

- Join the company that provides multiple ways to retain great skills and talent: part-time employees have opportunities to become full-time, and skilled temporary employees can become permanent;
- Work with a great team of professionals in a friendly and supportive work environment where management provides all needed direction without micromanagement;
- Work in a safe and secure location with onsite Datacenter and major dining options within walking distance;
- Benefit from multiple projects extensions;
- Get an opportunity to work extra hours to increase your bi-weekly paycheck;

Position 9
First Party Risk Manager (hybrid, 3 days onsite)

Job Description:

Work Setting: hybrid, 3 days onsite

Required:

- Working experience (5+ years);
- Experience with risk management frameworks and methodology;
- Experience with Projects (BA type work);
- Experience with risk assessments;
- Experience with GRC tools such as OneTrust, Archer, etc.;
- Experience with MS Office Suite, IT Risk Management, IT Governance, Audit or Regulatory Compliance;
- Experience with NIST SP800-37 or NIST RMF (Risk Management Framework), ISO 27005

Preferred:

- Experience with IT Security and Governance or Risk Management (5+ years);
- Experience with AI platforms, risks associated with AI, rolling out co pilot;
- Experience with networking, cloud, development, system administration;
- Experience with annual security training, phishing programs, LMS platforms (LMS 360)
- Active certifications in one of the related areas of security and governance such as CISA, CISSP, CRISC

Responsibilities include but are not limited to the following:

- Develop and implement information security governance frameworks, including policies and standards.
- Analyze and improve governance models to address gaps and align with best practices.
- Perform risk analysis and collaborate with stakeholders to identify and mitigate potential risks.
- Act as a liaison between IT Security, Risk, and business units to ensure cohesive security initiatives.
- Create and manage risk treatment plans and facilitate policy communication and education.
- Support security governance tasks and contribute to IT security projects and programs.
- Stay updated on emerging security trends and maintain high standards in governance practices.

Why apply?

- Work with one of the largest global vacation and cruise providers and a recognizable brand;
- Be a part of a diverse multicultural team and thrive in a fun and inclusive work environment dedicated to providing memorable and affordable vacations;
- Work with the leader in cutting-edge technology and programming;
- Be certain in your future as our Client is a stable and growing company with increasing revenue;
- Receive plenty of coaching and support from the team and current Vitaver consultants.

Enjoy a comprehensive employee benefits program:

- Get paid on a bi-weekly basis;
- During the 1st year of employment – prorated amount of PTO and Sick Time. After – 14 days of PTO annually and 10 days of sick time annually;
- Eight paid holidays annually;
- Available health, dental, and vision plans;
- Flexible spending account;
- 401K retirement savings plan;
- Employee Stock Purchase plan;
- Short and long-term disability plan;
- Cruise benefits;

- Discount and complimentary memberships (various complimentary memberships, discount cards, and passes: theme parks, various restaurants, wholesale clubs, car rental agencies, and cell phone providers to name a few).

Onsite perks:

- Fitness center;
- Child Development Center;
- Café and coffee shop;
- Learning Resource Center (LRC);
- Discounted dry cleaning service;
- Fuel service & car wash.

Position 10
Director, Technology – Identity and Access Management (hybrid)

Job Description:

Work Setting: Hybrid

Required:

- Availability to work occasionally at the Client's site in Miami, FL (required);
- Experience with identity and access management technologies (10+ years).
- Experience with Microsoft Azure and Active Directory as an administrator (5+ years);
- Mainframe provisioning experience;
- Experience with Certificate Management as an administrator (4+ years)

Preferred:

- Experience with creating strategy and working across boundaries to improve the security posture for the organization;
- Management/leadership experience;
- Experience with operating directory systems in a complex global organization.
- Experience with technical solution designs and architecture, and leadership for implementing security capabilities and security controls.
- Experience with developing and supporting solutions.
- IT and Security certifications.
- Bachelor's degree in Computer Science or related field. Or an advanced degree.

Responsibilities include but are not limited to the following:

- Lead a team of 3-15 global resources and/or contractors and act as the local IAM Operations leader for brands in North America.
- Create, maintain and drive technology strategies and roadmaps within IAM.
- Partner with application teams, compliance, end users, and support/operations groups to plan and drive the implementation of the technology and its capabilities.
- Responsible for the architecture of the technology, e.g., multi-factor authentication and single sign-on, web access management, certificate templates, and certificate management.
- Drive the development of identity and access specifications, standards, and processes to ensure adequate protection of the enterprise network.
- Design the identity and access solutions for applications or systems, and/or provide expertise and consulting to the project teams on identity and access controls needed.
- Utilize or develop reusable patterns, practices, and enterprise IAM processes that fit within the overall architectural blueprint

Why apply?

- Work with one of the largest global vacation and cruise providers and a recognizable brand;
- Be a part of a diverse multicultural team and thrive in a fun and inclusive work environment dedicated to providing memorable and affordable vacations;
- Work with the leader in cutting-edge technology and programming;
- Be certain in your future as our Client is a stable and growing company with increasing revenue;
- Receive plenty of coaching and support from the team and current Vitaver consultants.

Enjoy a comprehensive employee benefits program:

- Get paid on a bi-weekly basis;
- During the 1st year of employment – prorated amount of PTO and Sick Time. After – 14 days of PTO annually and 10 days of sick time annually;
- Eight paid holidays annually;

- Available health, dental, vision plans;
- Flexible spending account;
- 401K retirement savings plan;
- Employee Stock Purchase plan;
- Short and long-term disability plan;
- Cruise benefits;
- Discount and complimentary memberships (various complimentary memberships, discount cards and passes: theme parks, various restaurants, wholesale clubs, car rental agencies and cell phone providers to name a few).

Onsite perks:

- Fitness center;
- Child Development Center;
- Café and coffee shop;
- Learning Resource Center (LRC);
- Discounted dry-cleaning service;
- Fuel service & car wash.

Position 11
Oracle PLSQL Developer (Onsite)

Job Description:

Estimated Duration: 12 months with possible extensions

Work Setting: 100% of the time at the Client's site. No telecommuting or remote work. This is a non-negotiable requirement from the client

Required:

- Availability to work 100% of the time at the Client's site in Tallahassee, FL (required);
- Experience with Oracle databases with the capability to write complex queries and develop complex PL/SQL database objects, including both DML and DDL (7+ years);
- Experience in developing Oracle Forms (5+ years);
- Experience with database and/or SQL performance tuning (3+ years);
- Experience in full-stack development (3+ years);
- Experience developing application reporting, preferably with PHP and/or Classic ASP 3.0;
- Experience using code repositories, preferably Git;
- Experience using continuous integration tools, preferably Jenkins;
- Experience with relational database designs;
- Experience with Information Systems Development Methodology (ISDM);
- Experience with database query tools (i.e., TOAD, SQL Developer, SQL Navigator);
- Experience with database security, including role-based security;
- Experience with Unified Modeling Language (UML).

Preferred:

- Oracle certification(s);
- Experience with Agile development, specifically Scrum, Extreme Programming (XP) and Kanban;
- Experience in web development leveraging XML and CSS;
- Experience with JQuery (JavaScript library) or other JavaScript frameworks (such as AngularJS, NodeJS, and React);
- Experience with environmental regulatory business processes and practices;
- Bachelor's Degree in Computer Science, Information Systems or other Information Technology major, or equivalent work experience.

Responsibilities:

- Provide maintenance, enhancement and support for a variety of the agency's business applications.
- Assist in the preparation and documentation of program requirements and specifications;
- Research and document requirements of program users;
- Write, translate and code software programs and applications per specifications;
- Assist in the development and maintenance of user manuals and guidelines;
- Work with network administrators, systems analysts and software engineers to assist in resolving problems with software products or company software systems;
- Provide mentoring and guidance to junior programmers.

Position 12
NERC Compliance Analyst – Operations & Planning (Onsite)

Job Description:

Estimated Duration: 12 months with possible extensions

Work Setting: 100% of the time at the Client's site. No telecommuting or remote work.

Required:

- Availability to work 100% of the time at the Client's site in Pensacola, FL, Las Vegas, NV, Dallas, Austin, TX (required);
