

Medical Technologists needed

Run the chemistry, hematology, blood bank, and microbiology work that tells our doctors what's really going on — and call it in the moment it matters most.

WHAT YOU'LL DO

Perform specimen analysis in **chemistry, hematology, coagulation, blood bank, urinalysis, serology**, and bacteriology

Analyze results and interpret abnormal or unusual findings

Check accuracy of testing and record/report results

Call critical values to patient care staff immediately

Help train students and new lab staff

WHAT IT TAKES

Bachelor's degree in **Medical Technology, Medical Laboratory Science, Biology**, or **Chemistry** (or foreign equivalent)

National certification — **ASCP, AMT, NCA**, or **AAB** — or certification eligible

Comfortable following federal, state, and lab safety protocols

Works well under the direction of the Lab Manager/Director

\$60,590

 / year
