

EASED

This profile is a great style for any kitchen or bathroom. It is especially appropriate for a modern, clean look.

PENCIL

The Pencil edge is a simple profile that is a good fit for kitchens and bathrooms. It maximizes the visual thickness of the stone and works with both traditional and modern designs.

1/4" TOP AND BOTTOM ROUNDOVER

This edge has a slight curve on the bottom and the top. It works well with traditional designs.

Edge profiles on countertops may appear slightly different in person compared to photos due to factors such as lighting, fabrication, and the material itself. Profiles are shaped and polished by hand or machine, which can lead to slight variations compared to a sample or a photograph.
