EMS SKILLS: MCI / TRIAGE

2021 (Virtual Version)

Required Equipment: Score sheets, clip board, pens, stopwatch, blank piece of paper, PowerPoint file of MCI Event for current muster, computer/laptop to display patients to team

Objective: To demonstrate basic initial triage of multiple patients at a simulated MCI..

Evolution: Participants will identify their team leader to the evaluator. The evaluator will write down the four participant names on the score sheet. The team leader (#1) will triage the first three patients and then hand the triage reference sheet to #2 (who will triage patients 4-7). The team leader will track how many red, yellow, green, and striped patients the team triages. Team leader will then inform evaluator of the triage results..

Rules: START Triage parameters will be used for this event. The team will be provided with a reference sheet to use during the evolution. Time will begin when the Patient 1 slide is shown. Time will end when the team leader has completed their report of patient count/status to "command". There is no maximum time for this event. This event will be scored as a team only.

Penalties: **1.** Wrong team member triages a patient (out of turn, helps, etc).
2. Failure to correctly identify triage status of a patient (wrong color selected)
Each penalty listed above will add an additional 30 seconds to the team's time

Critical (Fail) Criteria: There are no fail criteria for this event.
