

LockJaw®

LockJaw® Hawse Fairlead for Synthetic Winch Lines

- Smooth, rounded surface for synthetic fibers
- Weather-resistant, salt/corrosion-resistant, UV-resistant
- Available in silver & black power coated finish

LockJaw® Fairleads are an integral component to your winching needs. Their smooth design and rounded edges safeguard your synthetic winch line from damage. Made of aircraft grade aluminum with a powder coated finish, our fairleads have the strength and durability to withstand years of continual use. Changing fairleads are necessary when transitioning your winch line from steel to synthetic, as their smooth finish prevents damage to synthetic materials. LockJaw fairleads are available in a range of sizes and are available in both black and silver finishes to complement and fit your winch setup. Includes stainless steel hardware for easy installation.

AVAILABLE SIZES

Item Number	Distance Between Mounting Holes	Overall Length (in.)	Overall Height (in.)	Overall Thickness (in.)	Weight (lbs.)	Powder Coat Color
28-0488s	4.88"	5.83	1.57	0.56	0.4	Silver
