

The XRPL's 1<sup>st</sup> Giving DAO Securing the Golden Timeline Launch Date: November 5<sup>th</sup>, 2021 www.HugeTitsCrypto.io

# \$HUGETITS Crypto

#### **About Us**

\$HUGETITS is a philanthropic "meme coin" built on the XRP Ledger and administrated as a decentralized autonomous organization (DAO). The XRP Ledger (XRPL) is a decentralized, public blockchain led by a global developer community. It's fast, energy efficient, and reliable. With ease of development, low transaction costs, and a knowledgeable community, it provides developers with a strong open-source foundation for executing on the most demanding projects—without hurting the environment.

#### **Our Vision**

We intend to bring about health, wealth and happiness through the power of huge tits, memes and the XRPL. To secure the Golden Timeline and ensure the success of the our token and our charitable objectives, HUGETITS is governed by our community of token holders in conjunction with an elected management board. The direction and scope of token growth, brand identity and charitable endeavors is driven by "We the People". As the XRPL's first "Giving DAO" we are honored to lead the revolution in crypto-based philanthropy.

## Philanthropy

Proceeds generated from the sale and trading of \$HUGETITS tokens and NFTs are donated to Free the Tataz non profit organization. "Free the Tataz is a non profit organization focused on the advancement of women's holistic breast health. Our mission is to support the natural healing and prevention of women's breast cancer and breast implant illness. By educating and empowering the public, medical professionals, and our institutions we begin to build a healthier and happier world." With strategic token metrics and fair and dedicated community governance we intend to ripple our enlightened vision, charitable deeds and meme magic across time and space.

## **Token Metrics**

**Token Currency Code: HUGETITS** 

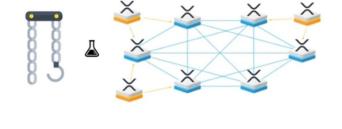

**Issuer Account:** 

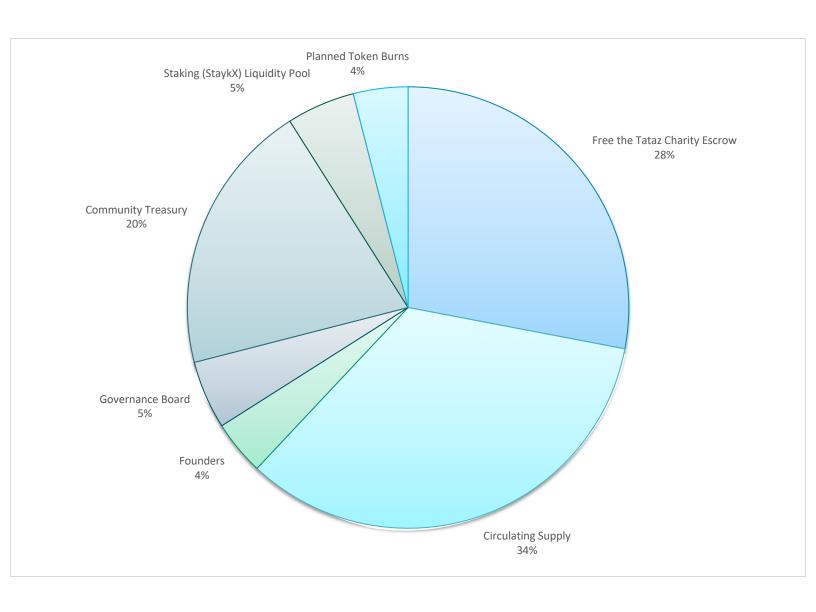

rEKKMW3MDVgrjPdcJLx49KEhF9ATEQwzPy

**Currency (HEX-Code):** 

**Total Supply:** 

21,000,000,000,000

## Free the Tataz Nonprofit Escrow

33% of all tokens were donated to Free the Tataz non profit organization. This escrow releases a portion of the escrowed tokens to the Free the Tataz nonprofit Organization each year.

#### **Circulating Supply**

Currently approximately 34% of all HUGETITS are held by the community and are freely traded on the open market.

## **Community Treasury**

20% of all tokens are held in our Community Treasury to fund community operations and development in regards to:

- Exchange liquidity
- Marketing
- Community Rewards
- Strategic Tech Innovation
- Legal & Compliance

## **StaykX Liquidity Pool**

5% of all tokens are reserved for the development and funding of a community staking platform. Through the Staykx platform you can stayk your HUGETITS tokens and earn passive income. By connecting your wallet to the Staykx platform, you can earn rewards without giving up custody of your tokens.

#### **Annual Token Burns**

To reduce supply and increase the equity of each token, we expect to perform annual token burns. HUGETITS is a "Blackholed" token. Additional tokens cannot be created.

#### **Founding Members**

The leaders and creators of HUGETITS retained 4% of the token allocation at project launch.

#### **Governance Board**

5% of all tokens are held by the governance board. The governance board works with the community to operate and develop HUGETITS to encourage community growth and maximize token value. The Governance Board is chosen based on the community and management's recommendations.

## **Passive Income Utility: Stayking**

Through the Staykx platform you can stayk your HUGETITS tokens and earn passive income. By connecting your wallet to the Staykx platform, you can earn rewards without giving up custody of your tokens. "The team at StaykX has designed a revolutionary form of decentralized stayking. The main outline is that you remain in control and custody of your own assets. No centralized pooling of your tokens, no fear of losing them, complete and utter control is handed to you."

By holding HUGETITS and connecting your wallet to Staykx, you have the choice to earn additional HUGETITS, STX (Staykx native token), or COCONUTS (Palm Tree Club rewards token).

COCONUTS is a rewards token that will be used to purchase exclusive NFTs and stayk to earn XRP rewards in the future.

**Free the Tataz** is a non profit organization focused on the advancement of women's holistic breast health. Our mission is to support the healing and prevention of women's breast cancer and breast implant illness. By educating and empowering the public, medical professionals, and our institutions we begin to build a healthier and happier world.

As society transitions to a new digital age, we intend to leverage the power of blockchain technology as a new way to support our philanthropic goals. Learn more about the new ways we are empowering our charity with crypto and NFTs.

## **Breast Implant Illness**

"Breast Implant Illness" is the term frequently used by women whose breast implants have caused a pattern of debilitating symptoms, such as joint pain, "brain fog," fatigue, and other flu-like symptoms that don't go away. Many but not all these health issues seem to be related to autoimmune disorders or connective tissue diseases. Breast implant illness is not a medical diagnosis and most plastic surgeons reject the term. However, many women with this pattern of health problems report that they recovered dramatically (sometimes completely) after their breast implants were removed. breastimplantinfo.org by the National Center for Health Research.

#### Breast Implant Associated-Anaplastic Large Cell Lymphoma (BIA-ALCL)

BIA-ALCL is a rare form of cancer of the immune system. Experts now agree that women with breast implants are more likely to develop ALCL. Since it will develop in the breast area, it is called Breast Implant Associated-ALCL (BIA-ALCL). breastimplantinfo.org by the National Center for Health Research.

## **NFTs**

NFT stands for "non-fungible token." At a basic level, an NFT is a digital asset that links ownership to unique physical or digital items, such as works of art, real estate, music, or videos. NFTs can be considered modern-day collectibles. They're bought and sold online and represent a digital proof of ownership of any given item. NFTs are securely recorded on a blockchain — the same technology behind cryptocurrencies — which ensures the asset is one-of-a-kind. The technology can also make it difficult to alter or counterfeit NFTs.

## **Starseed Baddies**

The "Starseed Baddies" NFT series was created by the HUGETITS community as an effort to raise money for the Free the Tataz non profit organization. Starseed Baddies are collector cards minted on the XRPL Sologenic NFT Marketplace. Currently 11 of the 15 collector cards have been released.

## **Collection Details:**

## **Starseed Baddies**

The Starseed Baddies have joined forces to spark the ascension of mankind and secure the Golden Timeline. With their powers combined they fight to destroy the evil Cabal and dismantle the 3D matrix slave system. The Baddies heeded our call and have come to free humanity and tune the frequency of our world to that of unconditional love, peace and harmony. Join the Starseed Baddies and help the collective usher in a new era of Heaven on Earth!

#### **Palm Tree Club Charitable NFTs**
