

Biblical Creationism OR:

1. **The Ruin and Reconstruction Theory**—The speculative notion arose as evolution’s influence began to spread and leaven the counterfeit ‘Christianity’ movement. Instead of casting down this vain imagination and bringing it into captivity to every thought to the obedience of Christ, pseudo-‘Christians’ were quick to accommodate the evolutionists. The ruin and reconstruction theorists said the biblical God lacked foreknowledge and made a mistake—Oops! Is the God of scripture cavalier, impulsive, without omniscience, absent-minded, and always second-guessing himself? These people seem to think so. He had to go back and make the world all over again because it was without form and void; never really wanting to know that the solution to this answer was elsewhere in scripture. With this re-creation of the world came also death, the curse, and the fall before it ever occurred in Genesis 3. Totally absurd.
2. **Theistic Evolution** (an oxymoron)—Not much better than the theory above, this speculative notion completely disregards scripture, while believing the biblical God came down to initiate the act of creation only to leave it up to evolution to take it from there. This, too, is completely absurd.
3. **Intelligent Design**—Placing its trust in some nebulous and unknowing cause, *intelligent design* completely ignores the person of Jesus Christ and the Bible’s narrative of the six-literal day witness of creation. Substituting Christ for a generic-ecumenical god, *intelligent design* allows wiggle room for longer periods of time and a process of creation that is fraught with all sorts of unbiblical processes and an order or sequence of creative events that is anything but biblical.

Conclusion: Because these theories deny the biblical account, they are doomed from the start. They are all an accommodation to evolution in one from or another. They all will eventually exalt man and debase the one true God and Creator—Jesus Christ—therefore their paths ultimately meet at the door of evolution. They also confuse the processes and destroy the order as accounted for in the creation narrative.

The non-creationist god is cavalier, impulsive, lacks omniscience, absent-minded, impotent, indecisive, and always second-guessing himself. This IS NOT the God of the sacred scriptures!!!

Theistic Evolution’s refusal to reject evolution’s underlying tenet of altruism or the belief that man is inherently good, reformable, and constantly improving is **THE LIE** that binds both together. The totalitarian connection between Nimrod (pictured above, left), history’s first religious tyrant, and Charles Darwin (pictured above, right), cultural champion of evolution, cannot be overstated. Both personalities were rabid atheists whose [collectivist teachings](#) have enslaved and slaughtered millions.
